Reporting Period FY 2009

Compare CareWVTM

Provides Hospital Quality Information

For years, **CompareCareWV**TM has been a user friendly website that guides consumers through a simple process to determine how much WV hospitals charge, on average, for selected procedures and diagnostic tests.

Additional information is now available to help consumers compare hospitals based on two factors: charges **AND** quality.

Quality indicators are now available to measure the effectiveness of care provided in WV hospitals and demonstrate how often recommended treatments are provided that

are recognized for getting the best results for patients with certain medical conditions or surgical procedures.

Customized charts can now be built comparing the quality of hospital care in the following areas:

- Six measures related to Pneumonia Care
- Seven measures related to Heart Attack Care
- Four measures related to **Heart Failure Care**
- Eight measures related to **Surgical Infection Care**

The outcome of hospital admissions – **Readmissions and Mortality Rates** – may also be compared to demonstrate whether a hospital is doing its best to prevent complications, teach patients at discharge, and ensure patients make a smooth transition to their home.

The goal of CompareCareWV™ is to provide information that will help patients and their families become more involved in choosing the right hospital appropriate for their need.

See and compare how West Virginia hospitals perform on patient care measures, patient experiences, readmissions, mortality rates, and costs: www.comparecarewv.gov.

FINANCIAL HIGHLIGHTS

Hospitals

Overall, the profitability of West Virginia hospitals decreased in FY 2009. Profits of \$44.2 million or 0.9% of net patient revenue (NPR) were reported, down from \$85.6 million (1.9% of NPR) in FY 2008.

The West Virginia Health Care Authority's primary focus emphasizes the *operations* of healthcare providers versus the effects of *financial market fluctuations*. As such, this report excludes the impact of certain market changes related to investments such as derivative agreements and related accounting standards from hospital profits and losses, except where the market effects are specifically addressed or otherwise noted.

For further discussion regarding the effect of the global market changes on West Virginia hospitals, see the Hospital Narrative in this report and the 2009 Annual Report.

Acute Care Hospitals

The total profit margin for the 34 general acute care hospitals decreased for the second year to 0.2%, with profits of \$7.6 million, down from \$67.4 million (1.7% of NPR) in the prior year. This decrease included a write-off of Goodwill of \$25.1 million.

In FY 2007, profit was \$171.3 million (4.5% of NPR).

Critical Access Hospitals (CAH)

Profitability for the 17 CAHs increased after a one-year decrease. The aggregate profit was \$9.1 million (3.1% of NPR), up from \$789,000 (0.3% of NPR) in FY 2008. In FY 2007, profit was \$5.8 million (2.3% of NPR).

Long-term Acute Care Hospitals (LTCH)

The two facilities in FY 2009 reported a profit of \$7.1 million (21.6% of NPR), an increase over the FY 2008 profit of \$2.6 million (9.5% of NPR).

Psychiatric Hospitals

The psychiatric hospitals had an aggregate profit of \$1.1 million (3.3% of NPR), with the two state psychiatric hospitals losing \$2.3 million combined and the two private hospitals earning profits of \$3.4 million. The prior year's overall loss was \$3.0 million (9.9% of NPR).

Rehabilitation Hospitals

The five rehabilitation hospitals reported aggregate profits of \$19.3 million (20.4% of NPR). In FY 2008, aggregate profits were \$17.8 million (19.3% of NPR).

Other Facilities

Nursing Homes

The overall profit margin for the state's 105 nursing homes decreased by 1.3%. Aggregate profit for FY 2009 was \$47.2 million (6.1% of NPR); for FY 2008 it was \$53.9 million (7.4% of NPR).

The decrease in profits for the nursing homes in FY 2009 was entirely due to the decrease of other revenue to \$5.1 million. In FY 2008 other revenue included a gain on sale of assets of \$14.8 million from the sale of two nursing homes. The level of other revenue for FY 2009 is comparable to the \$5.9 million for FY 2007.

Aggregate NPR increased \$36.4 million in FY 2009; expenses increased \$25.8 million.

Home Health

Overall, home health agencies reported total profits of \$10.1 million on \$117.8 million total revenue; 35 of the 63 agencies were profitable.

Three home health agencies were acquired during FY 2009. Five were acquired in FY 2008 and 11 in FY 2007.

Hospice

Hospice profits for the 20 agencies were \$3.8 million compared to \$449,000 in FY 2008.

Total revenue increased by \$6.8 million, while expenses increased by \$3.5 million.

Behavioral Health Facilities

Eighty-seven behavioral health providers reported aggregate profits of \$20.7 million, 3.6% of total revenue; 48 of 87 facilities were profitable.

Methadone Treatment Facilities

The cumulative profit for the nine facilities was \$7.9 million, 36.2% of total revenue. Each provider was profitable for FY 2009.

Renal Dialysis Centers

Twenty-six renal dialysis centers reported an aggregate profit of \$27.8 million, 29.4% of total revenue; 22 of the centers were profitable.

Ambulatory Surgical Centers (ASC)

Eleven reporting certified ASCs had an aggregate profit of \$5.3 million, 19.7% of total revenue. Nine of the 11 reported a profit for the year.

OVERVIEW OF KEY INDICATORS

The West Virginia Health Care Authority (Authority) collects and disseminates financial data on health care facilities, including hospitals, nursing homes, home health agencies, hospice agencies, behavioral health centers, renal dialysis centers and ambulatory surgical centers. The reporting period is the facility fiscal year which ended during the calendar year. Therefore, the data are reflective of a time span rather than of one point in time. The data are presented here as reported by the

facilities. While the manner and type of information submitted varies with the type of facility, efforts have been made to produce reasonable comparisons. Where the number of hospitals has changed since the previous year, a "same-facilities" comparison is often used.

This report includes information related to 384 health care providers operating in West Virginia in FY 2009.

Number of Facilities or Agencies Operating						
Type of Facility or Agency	FY 2007	FY 2008	FY 2009			
Hospitals	64	63	62

Renal Dialysis Centers	NR	26	26			
Ambulatory Surgery Centers	11	11	11			
Total	364	391	384			

Total Revenue

The facilities included in this report had aggregate revenue of \$6.6 billion from patient services along with other operating and non-operating revenue. There was an increase in total revenue of \$338 million (5.4%) over FY 2008.

General acute care hospitals accounted for \$218 million (64.4%) of the growth in revenue. Behavioral health centers and critical access hospitals provided another \$26.9 million (8.0%) and \$24.4 million (7.2%), respectively, of the total increase in revenue.

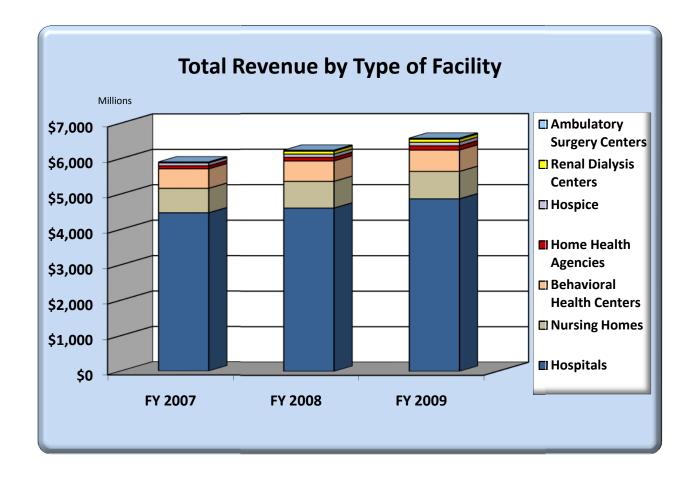

Type of Facility or Agency	Total Revenue (in thousands)				
Type of Facility of Agency	FY 2007	FY 2008	FY 2009		
Hospitals	\$4,467,256	\$4,599,494	\$4,858,995

Ambulatory Surgery Centers	23,992	25,550	26,934		
Total	\$5,900,909	\$6,234,339	\$6,572,392		
Percentage Change from Prior Year*	5.5%	4.1%	5.4%		

NR: Not Reported

^{*}FY 2008 percentage adjusted to exclude renal dialysis revenue for comparison purposes.

The percentage of total revenue generated by each facility type in FY 2009 is as follows:

- Hospitals 73.9%
- Nursing Homes 11.8%
- Behavioral Health Centers 9.2%
- Home Health Agencies 1.8%
- Hospices 1.5%
- Renal Dialysis Centers 1.4%
- Ambulatory Surgery Centers 0.4%

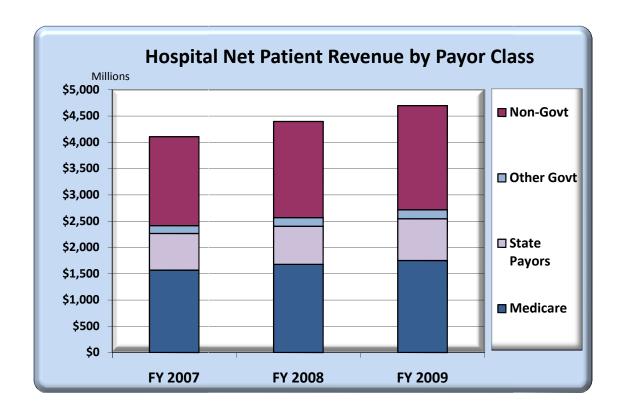

Net Patient Revenue

Net patient revenue (NPR), the amount received for patient services, is also reported by payor categories for hospitals and nursing homes.

For hospitals in FY 2009, nongovernmental payors (commercial, Blue Cross Blue Shield, Carelink, unions, ERISAs, self-pay) provided the largest amount of revenue of \$2.0

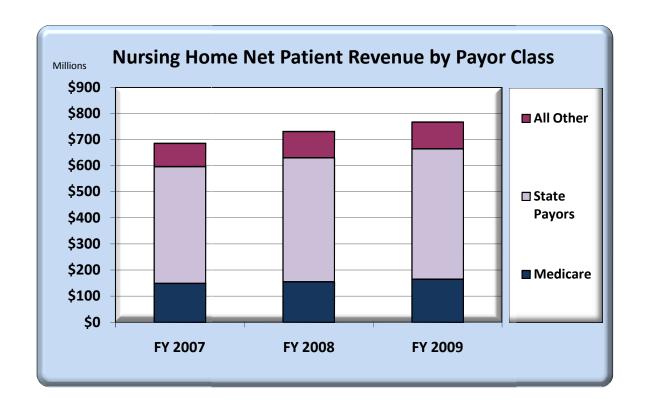

billion, closely followed by Medicare of \$1.7 billion. State payors (Medicaid, PEIA) and other governmental payors (VA, Worker's Comp, etc.) combined provided revenue of \$966 million.

Total net patient revenue for all payors equaled \$4.7 billion, an increase of 6.8% over the prior year.

For nursing homes, Medicare and Medicaid revenue equaled \$165 million and \$499 million, respectively. Revenue from other

payors combined was \$104 million. Total net patient revenue was \$768 million, an increase of 5.0% over FY 2008.

Excess Revenue (Deficit) Over Expenses (EROE)

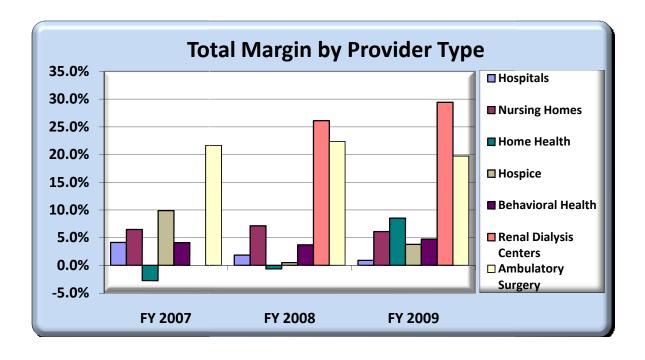

Aggregate profits for all facilities were \$167 million, a decrease of \$23.0 million from FY 2008. The term profit (loss) is used here interchangeably with excess (deficit) of revenue before taxes and extraordinary items (EROE), and is applied to all facilities, including not-for-profits. Hospitals, nursing homes and ambulatory surgery centers had decreased profits. Behavioral health centers,

home health agencies, hospices and renal dialysis centers reported improved EROEs.

Hospitals and nursing homes combined accounted for 85.7% of the total revenue and 54.7% of the total profit. Nursing home profits exceeded hospital profits by \$3.0 million.

Type of Provider	EROE (in 000's)			Margin		
Type of Provider	FY 2007	FY 2008	FY 2009	FY 2007	FY 2008	FY 2009
Hospitals*	\$184,548	\$85,561	\$44,203	4.1%	1.9%	0.9%
Nursing Homes	44,848	53,875	47,162	6.5%	7.2%	6.1%
Behavioral Health	22,763	21,266	28,576	4.1%	3.7%	4.7%
Home Health	(2,322)	(579)	10,059	-2.8%	-0.6%	8.5%
Hospice	8,333	449	3,767	9.9%	0.5%	3.8%
Renal Dialysis Centers	NR	23,291	27,844	NR	26.1%	29.4%
Ambulatory Surgery	5,200	5,733	5,316	21.7%	22.4%	19.7%
Total	\$263,370	\$189,596	\$166,927	4.5%	3.0%	2.5%

^{*}Profits have been adjusted to remove the impact of certain investment losses related to market fluctuations in FY 2008 and FY 2009.

Utilization

Hospitals continue to experience small but steady decreases in inpatient discharges. Over time the impact has grown in significance; over a five year period total inpatient discharges have decreased by 25,872 (8.5%), including a decrease of 4,041 (1.4%) in FY 2009.

Change in Total Discharges					
FY 2005	-9,752	-3.2%			
FY 2006	-5,072	-1.7%			
FY 2007	-1,151	-0.4%			
FY 2008	-5,856	-2.0%			
FY 2009	-4,041	-1.4%			
Total	-25,872	-8.5%			

The five-year decline in Medicare discharges of 12,872 (8.5%) accounts for 50% of the total decrease. Nongovernmental discharges decreased by 10,923 (13.7%), which accounts for 42%, of the total decline. Medicaid declined the least, by only 511 discharges (1.0%), over the same period.

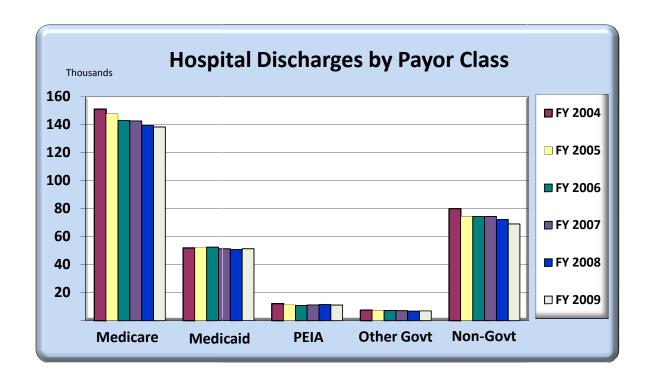

While the exact cause of the decline cannot be determined, a few factors that may have impacted this include:

- a decrease in the number of cardiac related discharges;
- growth in outpatient treatments; and,
- a decrease in the number of hospitals from 65 in FY 2004 to 62 in FY 2009.

Hospital Discharges by Payor Class								
				Other	Non-			
Payor	Medicare	Medicaid	PEIA	Govt.	Govt.	Total		
FY 2004	151,112	51,898	12,167	7,675	79,995	302,845		
FY 2006	142,895	52,484	10,847	7,305	74,490	288,021		
FY 2008	139,422	50,916	11,533	6,818	72,325	281,014		
FY 2009	138,240	51,387	11,170	7,104	69,072	276,973		
1 Year Change (FYs 08-09)	-0.8%	0.9%	-3.1%	4.2%	-4.5%	-1.4%		
3 Year Change (FYs 06-09)	-3.3%	-2.1%	3.0%	-2.8%	-7.3%	-3.8%		
5 Year Change (FYs 04-09)	-8.5%	-1.0%	-8.2%	-7.4%	-13.7%	-8.5%		
FY 2009 Payor Mix	49.9%	18.6%	4.0%	2.6%	24.9%	100.0%		

Discharges covered by nongovernmental payors accounted for 24.9% of total discharges, and approximately 23% of gross inpatient revenue. Medicare was the largest payor, with 49.9% of the discharges,

and 53% of inpatient charges. The remaining 25.2% of discharges were covered by Medicaid, PEIA and other governmental payors, and generated 24% of inpatient charges.

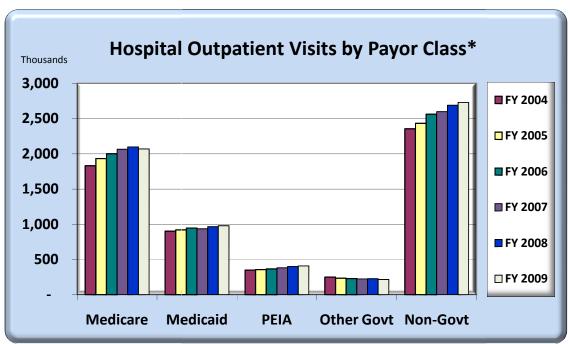

Utilization of hospital outpatient services remained relatively flat for FY 2009, with a slight increase of 21,262 visits (0.3%). Inpatient revenue remains the larger portion of total charges (51%), but the significance of outpatient revenue has grown over the last five years, increasing from 43% to 49%. This reflects the increase in outpatient visits. There were 6.4 million outpatient visits in FY 2009. Over five years, outpatient utilization has grown by 12.6% (716,767) visits. Utilization covered by nongovernmental payors accounted for

52.4% of the five-year increase in visits; the increase in Medicare visits equaled 33.3% of the total growth.

The payor mix is substantially different for outpatient services compared to inpatient services. Whereas Medicare dominates the inpatient utilization, the nongovernmental payor class is the largest category of outpatient payors with 42.6% of visits, followed by Medicare with 32.3%, and Medicaid with 15.3%.

Hospital Outpatient Visits by Payor Class *								
				Other				
Payor	Medicare	Medicaid	PEIA	Govt	Non-Govt	Total		
FY 2004	1,830,235	900,747	350,629	249,899	2,354,477	5,685,987

^{*}Excludes distinct units such as home health, hospice, clinics and physician visits

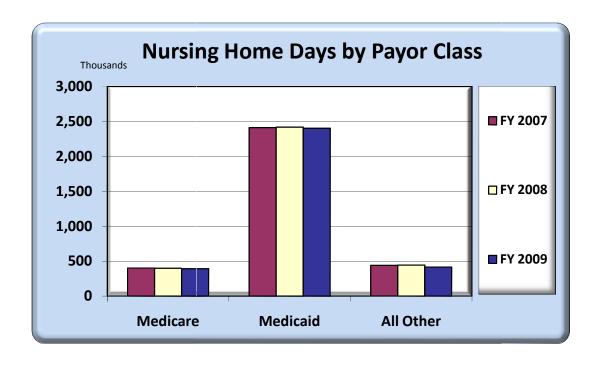

*Excludes distinct units such as home health, hospice, clinics and physician visits

Nursing home utilization remains stable with a slight decrease of 1.5% in total patient days between FY 2008 and FY 2009. There were 9,873 licensed nursing home beds reported statewide for FY 2009, a decrease from 10,068 beds in FY 2008.

Total patient days of 3.2 million equaled an occupancy rate of 89.1%.

Governmental programs pay for the vast majority of nursing home services; Residents covered by Medicare and Medicaid equal 87.0% of patient days. Medicaid, with 2.4 million inpatient days (74.8%), is by far the largest payor; Medicare days equal 392,932 (12.2%). Medicare covers only skilled nursing services.

Some nursing homes offer outpatient services, such as physical, occupational and speech therapies, but the level of utilization has historically been minimal.

HOSPITALS

The FY 2009 economic status of West Virginia's hospitals is presented according to their respective service type, which includes:

- general acute care hospitals 34 facilities
- critical access hospitals 17 facilities
- long-term acute care hospitals 2 facilities
- psychiatric hospitals 4 facilities
- rehabilitation hospitals 5 facilities.

The mix of services provided by each hospital grouping varies to the extent that each one should be presented independently of the others. The data tables provided after the narrative section begin with general acute care hospital statistics followed by data for all facility types.

As a group, West Virginia's 62 hospitals reported a decrease in profitability in FY 2009. Profit (loss) is used here to mean excess (deficit) of revenue over expenses (EROE) prior to:

- taxes,
- any extraordinary gains or losses, and
- certain changes in market values of investments.

EROE is used for not-for-profit as well as for-profit hospitals.

- Total profit for FY 2009 was \$44.2 million, or 0.9% of net patient revenue (NPR). Profit for the year was reduced by \$25.1 million as a result of a write-off of Goodwill by one hospital.
- This was the second year in a row that a decrease in profitability was reported; profits increased in FY 2007 and FY 2006.

EROE – All Hospitals (In Thousands) Margin on Net Patient Revenue

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009*
EROE	\$78,568	\$177,586	\$190,142	\$85, 561	\$44,203
Margin	2.1%	4.5%	4.6%	1.9%	0.9%

^{*}EROE for FY 2009 would be \$69.3 million, and equal a margin of 1.5%, without the write-off of Goodwill.

Special Items of Note for FY 2009

The problems in the financial markets that began in FY 2008 significantly affected multiple hospitals in West Virginia. Market improvements in FY 2009 provided a partial reversal of the prior year's downturn. It was determined last year that the impact of the financial markets, plus ongoing changes in accounting standards, necessitated a modification in reporting investment income and losses in the Uniform Financial Report (UFR), which is the hospital data source for this report. This change in reporting, while applicable to all hospitals, affects only those larger hospitals, or members of hospital systems, that have derivative agreements and/or have adopted Statement of Financial Accounting Standard (SFAS) 159.

The impact of extreme market fluctuations that can occur with derivative investment instruments and certain accounting standards should not be included in those areas of the UFR that are utilized by the Health Care Authority in its rate setting and reporting functions. The impact of these changes is now included only within the profit or loss, after tax and after extraordinary items. The profits and losses displayed in the WVHCA FY 2009 annual report tables are pre-tax and pre-extraordinary items; as such, changes in the market value of derivatives and other investments related to the adoption of SFAS 159 are not included within the FY 2009 tables.

Only the data for fiscal years 2009 and 2008 data are adjusted. The impact to FY 2007 data from these factors, however, is negligible. The market fluctuations as related to specific hospitals are discussed below.

Because of the closure of four hospitals: Richwood (FY 2008), St. Luke's (FY 2007), Guyan Valley (FY 2006) and WV Rehabilitation Center (FY 2006), same-facilities comparisons are made in total and for those categories when comparing data with prior years. Unless otherwise indicated, the hospital narrative uses the same-facilities comparisons.

Detailed information on aggregate and individual hospital income as well as utilization is shown in Tables 6-19.

General Acute Care Hospitals

These hospitals primarily provide short-stay medical-surgical services, although they may include units providing a wide range of other services. There were 34 general acute care hospitals in FY 2009.

Financial Results

Financial items of note regarding the general acute care hospitals included:

- Profits from acute care hospitals were down \$59.8 million, decreasing from \$67.4 million (1.7% of NPR) in FY 2008 to \$7.6 million (0.2% of NPR) in FY 2009. Nearly 42% (\$25.1 million) of the decrease in profitability was the result of the write-off of Goodwill by St. Joseph's of Parkersburg.
- Reduced profitability in FY 2009 resulted from a \$49.5 million decrease in other revenue, which included the reduction of Goodwill, and an increase in the loss on patient services of \$10.3 million.

EROE – General Acute (In thousands) Margin on Net Patient Revenue

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
EROE	\$63,250	\$124,680	\$171,317	\$67,440	\$7,594
Margin	1.9%	3.5%	4.5%	1.7%	0.2%

^{*}EROE for FY 2009 would be \$32.7 million, and equal a margin of 0.8%, without the write-off of Goodwill.

- Three hospitals experienced decreases in other revenue of \$51.9 million (104.8% of the total decrease): Camden-Clark (\$7.9 million), WVUH (\$18.9 million), and St. Joseph's Parkersburg (\$25.1 million).
 - o Camden-Clark reported a decrease in investment income of \$7.9 million;
 - o WVUH had significant losses on the sale of investments; and,
 - St. Joseph's write-down of Goodwill stemmed from the adoption of SFAS 142, which pertains to the accounting for intangible assets, and the purchase of the facility by LifePoint WV Holdings and LifePoint WV Limited Partner from Columbia-St. Joseph's Healthcare System in FY 2006.
- Eighteen of the 34 acute care hospitals reported a profit for FY 2009. Gains ranged from Jackson General's \$46,000 (0.2% of NPR) to Greenbrier Valley's \$18.3 million (26.7% of NPR).

Hospitals with a Positive EROE – General Acute

FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
20	22	27	23	18

- Losses from the 16 remaining hospitals ranged from CAMC Teays Valley's \$33,000 loss (0.01% of NPR) to St. Joseph's of Parkersburg's loss of \$29.3 million (28.6% of NPR).
- Twenty-one hospitals reported decreased profitability as a result of either a decrease in profits or an increase in losses.
- The number of hospitals with margins (profit as a percent of NPR) greater than 10% declined for the second year in a row:

Hospitals with a Margin of at least 10% - General Acute

FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
2	3	6	4	3

- The hospitals with margins greater than 10% in FY 2009 were, in descending order, Charleston Surgical Hospital (30.4%), Greenbrier Valley (26.7%), and Raleigh General (13.6%). These hospitals, all for-profit facilities, had the top three rankings in FY 2008.
- Two hospitals had a margin between 5% and 10%, Logan Regional (8.2%), which fell from 10.0% last year, and United Hospital (5.0%).

Hospitals with a Margin of 5% - 9.9% - General Acute

FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
3	8	7	1	2

The state's largest two hospitals, Charleston Area Medical Center (CAMC) and West Virginia University (WVUH), had margins of -0.1% and -2.7%, respectively, both of which were a decrease from the prior year. CAMC's increase in operating expenses outpaced net patient revenues by \$14.2 million, while WVUH experienced a decline of \$18.9 million in other revenue. These two hospitals account for 28.5% of total general acute care net patient revenues.

	Hospitai ivia	rgins of the Sta	ate's Two Larg	est Hospitais	
	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
CAMC	2.8%	5.5%	0.4%	1.7%	(0.1%)
WVUH	5.0%	5.9%	10.8%	(1.4%)	(2.7%)

As discussed in the preceding *Special Items of Note* section, significant changes in market forces and new investment instruments have impacted global, national and local enterprises in the last couple of years. Recently implemented changes in accounting standards compound the changes in economic forces that cause certain market value fluctuations to be included within hospitals' statements of operations. These circumstances can result in substantial swings in profitability from year to year and can mask factors of operation that are more relevant to the Authority's mission. For example, in FY 2008 ten hospitals reported combined losses of \$191.5 million due to market fluctuations of derivative agreements and the adoption of SFAS 159. However, with the improvement of the market in FY 2009 these factors are resulting in market-value profits of \$102.0 million, a swing of \$293.5 million. The Authority determined that these factors would be reported separately so the impact of market variation is not included in the discussion above.

The top three hospitals reporting gains from market fluctuations of derivatives and/or the impact of adopting SFAS 159 are:

- WVU Hospitals \$47.6 million gain;
- CAMC \$47.3 million gain; and,
- United Hospital \$21.1 million gain.

These three hospitals account for 113.7% of the market gains reported; seven hospitals continued to experience market losses totaling \$18.0 million.

Market fluctuations may continue to occur periodically and result in significant swings in profitability. It is the Authority's position that profits and losses from operations should not be obscured by market variations. If these gains were included, the aggregate profit of \$7.6 million for general acute care hospitals would be increased to \$109.6 million.

Patient Services

An important element of the financial status of hospitals is income from patient services.

- Overall, hospitals experienced losses on patient services.
- For FY 2009 aggregate losses of \$81.2 million (1.9% of NPR) were reported compared to \$70.9 million (1.8% of NPR) in FY 2008.

Aggregate Income/(Loss) on Patient Services – General Acute (in thousands)

Margin of Net Patient Revenue

FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
(\$92,592)	(\$56,761)	(\$47,007)	(\$70,908)	(\$81,247)
(2.8%)	(1.6%)	(1.2%)	(1.8%)	(1.9%)
	(\$92,592)	(\$92,592) (\$56,761)	(\$92,592) (\$56,761) (\$47,007)	(\$92,592) (\$56,761) (\$47,007) (\$70,908)

Twenty-three hospitals reported losses on patient services ranging from \$418,000 (1.7% on NPR) at Jackson General to \$37.3 million (5.4% of NPR) at CAMC.

A review of the losses on patient services as a percentage of net patient revenue (NPR) reveals:

- Welch Community reported the largest loss on patient services of 45.7% of NPR (\$8.5 million).
- St Joseph's Hospital in Buckhannon had the next largest loss of 20.1% of NPR (\$5.4 million).

A review of hospitals reporting positive incomes on patient services reveals:

- Eleven hospitals reported profits on patient services ranging from \$75,000 (0.1% of NPR) at St. Francis to \$18.0 million (26.3% of NPR) at Greenbrier Valley.
- For-profit hospitals reported the top four margins on patient care: Charleston Surgical (26.7%), Greenbrier Valley (26.3%), Raleigh General (13.1%) and Logan Regional (7.9%).
- There were seven not-for-profit hospitals with positive margins ranging from 0.1% (St. Francis) to 3.3% (Stonewall Jackson).

Uncompensated care, which reduces net patient revenue, decreased from 6.5% of gross patient revenue (GPR) in FY 2008 to 6.3% of GPR in FY 2009. Uncompensated care as a percentage of gross patient revenue has remained relatively constant (0.6% fluctuation) during the last five years.

Uncompens	sated Care as %	of Gross Patier	nt Revenue – Ge	eneral Acute
FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
5.9%	6.3%	6.4%	6.5%	6.3%

Other Revenues

Other revenues provide a secondary role compared to patient revenues, but are nevertheless an important component of a hospital's financial status and are often the only source of a positive margin. Other revenues consist of other non-patient operating revenue and non-operating revenues. Key items include:

- The increase in losses on patient services was compounded by a decrease in other revenue of \$49.5 million (35.8%). The write-off of Goodwill, described above, was responsible for \$25.1 million of this decrease.
- Other revenues have decreased by 43.0% since FY 2005; without the write-off of Goodwill the four-year decrease would be 26.9%.

Aggregate Other Revenue – General Acute (in thousands)

Percentage Change

FY 2005	FY 2006	FY 2007	FY 2008	FY 2009*
\$155,842	\$181,441	\$218,324	\$138,348	\$88,841
	16.4%	20.3%	(36.6%)	(35.8%)

^{*}Other revenue for FY 2009 would be \$113.9 million without Goodwill loss.

- Nineteen of the 34 general acute care hospitals reported decreases in other revenue with 11 hospitals experiencing decreases greater than \$1.0 million. The median decline was \$1.5 million.
- Fifteen hospitals reported increases in other revenues in FY 2009, as compared to ten such hospitals in FY 2008. The largest increase was \$11.4 million by Cabell-Huntington. This increase was a return to typical levels of other revenue after a \$14.0 million decrease in net assets released from restrictions in the prior year.
- Seven hospitals, with losses on patient services, reported profits solely because of other revenues.

		,	Revenue – Gene	,, a, , toate
FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
٥	10	13	14	7

Operating Expense

A final component impacting the hospitals' financial position is operating expense.

 Overall, acute care expenses equaled \$4.3 billion in FY 2009, an increase of 6.8% over FY 2008.

Operating Expenses – General Acute (in billions) Percentage Increases over Prior Year

FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
\$3.3	\$3.4	\$3.6	\$3.8	\$4.1	\$4.3
8.1%	4.6%	4.5%	5.9%	6.0%	6.8%

• For acute care hospitals, employee compensation and benefits equaled \$2.1 billion, an increase of 6.2% over FY 2008. This is the largest component of total operating expenses (48.6%).

Salaries and Benefits – General Acute (in billions) Percentage Increases over Prior Year Full-time Equivalents (FTEs)

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
Salaries/Benefits	\$1.7	\$1.8	\$1.9	\$2.0	\$2.1
Percent Change	NA	5.2%	3.6%	6.2%	6.2%
FTEs	31,190	31,795	32,142	33,018	33,624

Critical Access Hospitals

Critical Access is a Medicare designation for reimbursing small community hospitals at cost levels for the provision of limited acute care services in combination with swing-bed and skilled nursing care. In FY 2009, the 17 critical access hospitals reported improved results overall.

The West Virginia Department of Health and Human Resources is in the process of finalizing cost settlements covering multiple years for hospitals. The amounts of these settlements, though presently unknown, could result in future liabilities that might have a material financial impact upon individual facilities.

Financial items of note regarding the critical access hospitals included:

- Total profit for FY 2009 was \$9.1 million (3.1% of NPR) up from \$789,000 (0.3% of NPR).
- The increase in profit of \$8.3 million over the prior year was due to an increase in income from patient services of \$6.8 million and an increase in other revenue of \$1.4 million.
- Thirteen critical access hospitals reported profits in FY 2009.

EROE – Critical Access (In thousands) Margin on Net Patient Revenue Hospitals with Positive EROE

	FY 2006	FY 2007	FY 2008	FY 2009
EROE	\$4,282	\$5,835	\$789	\$9,082
Margin	1.8%	2.3%	0.3%	3.1%
Positive EROE	12	11	9	13

- Seven of the 17 hospitals reported positive income from patient services for FY 2009; ten hospitals experienced improved income from patient services over the prior year.
- This is the first year that critical access hospitals have reported a positive income from patient services, with an aggregate of \$1.1 million, since at least FY 2003.

Income from Patient Services (IPS) – Critical Access (In thousands) Margin on Net Patient Revenue Hospitals with Positive IPS

	FY 2006	FY 2007	FY 2008	FY 2009
IPS	(\$3,652)	(\$3,042)	(\$5,737)	\$1,108
Margin	(1.5%)	(1.2%)	(2.2%)	0.4%
Positive IPS	6	6	5	7

 Net patient revenue increases of \$22.9 million (8.6%) outpaced an increase in operating expenses of \$16.1 million (5.9%), which resulted in the positive margin on patient services. • For critical access hospitals, employee compensation and benefits equaled \$161.9 million, an increase of 6.0% over FY 2008.

Salaries and Benefits – Critical Access (in millions) Percentage Increases over Prior Year FTFs

		'		
FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
\$133.4	\$136.3	\$142.3	\$152.8	\$161.9
NA	2.2%	4.4%	7.3%	6.0%
2,857	2,867	2,923	2,970	3,037
	\$133.4 NA	FY 2005 FY 2006 \$133.4 \$136.3 NA 2.2%	FY 2005 FY 2006 FY 2007 \$133.4 \$136.3 \$142.3 NA 2.2% 4.4%	FY 2005 FY 2006 FY 2007 FY 2008 \$133.4 \$136.3 \$142.3 \$152.8 NA 2.2% 4.4% 7.3%

Key items related to specific hospitals included:

- Five hospitals reported an improvement in income from patient services of over \$1.0 million: Jefferson Memorial (\$2.6 million), Morgan County War (\$1.9 million), Sistersville General (\$1.2 million), Boone Memorial (\$1.2 million) and Grafton City (\$1.1 million).
- Jefferson Memorial, which is part of the West Virginia University Health System, reported an increase of \$2.4 million in net patient revenue and a slight decrease in operating expenses.
- Three hospitals reported more than \$1.0 million in profits in FY 2009: Plateau Medical \$3.1 million (10.5% of NPR), Jefferson Memorial \$2.4 million (6.3% of NPR), and Morgan County War \$2.0 million (10.9% of NPR).
- Four hospitals reported losses ranging from \$164,000 (Hampshire) to \$677,000 (Pocahontas).
- Reported income from patient services, ranged from Sistersville General's \$25,000 (0.3% of NPR) to Plateau Medical's \$3.0 million (10.2% of NPR).
- Losses on patient services ranged from Hampshire's \$114,000 (1.0% on NPR) to Minnie Hamilton's \$2.2 million (17.4% of NPR).

Long-term Acute Care Hospitals

Long-term Acute Care Hospitals (LTCH) are generally defined as hospitals with an average Medicare inpatient length of stay greater than 25 days. These facilities provide extended care including comprehensive rehabilitation, respiratory therapy, head trauma treatment, and pain management.

Two LTCHs operated in West Virginia in FY 2009. Both facilities are for-profit and privately owned. Select Specialty began providing services during 2001. Originally located within CAMC, Select Specialty moved to St. Francis Hospital during FY 2007. Cornerstone Hospital of Huntington opened in March 2005 and is located within St. Mary's Hospital.

Items of note regarding the financial status of long-term acute care hospitals included:

• Total profit for FY 2009 was \$7.1 million (21.6% of NPR).

EROE – LTCH
(in thousands)
Margin on Net Patient Revenue

	FY 2006	FY 2007	FY 2008	FY 2009
EROE	\$3,291	\$1,500	\$2,575	\$7,119
Margin	12.4%	5.9%	9.5%	21.6%

- For FY 2009 Cornerstone reported a profit of \$6.3 million (35.9% of NPR) up from \$2.9 million (20.9% of NPR) in the prior year. Income from patient services provided 99.5% of Cornerstone's total profits.
- Select Specialty reported a profit of \$832,000 (5.4% of NPR), compared to a loss of \$362,000 (2.7% of NPR) in FY 2008. Income from patient services equaled \$805,000 (5.2% of NPR) in FY 2009.

Psychiatric Hospitals

Two private (Highland and River Park) and two state (Mildred M. Bateman and Sharpe) hospitals operate as free-standing psychiatric hospitals in West Virginia. Although both the private and state hospitals treat patients with mental illness, state-run facilities have taken the lead role in providing publicly funded care. Payor mix and coverage for the uninsured is substantially different for private hospitals as compared to state-run hospitals. As a result, state-run facilities provided over \$48 million in charity care. Aggregate profits for the psychiatric facilities as a sector equaled \$1.1 million. These facilities provided 485 licensed

psychiatric beds in West Virginia, which are almost equally divided between private and state hospitals. General acute care hospitals provided more than 500 additional psychiatric beds.

Financial items related to the private psychiatric hospitals included:

- Aggregate profits for FY 2009 of \$3.4 million, which is an increase of \$2.4 million over the prior year.
- An increase in net patient revenue of \$3.8 million, which outpaced an increase in operating expenses of \$1.6 million.
- An increase in other revenue of \$164,000.
- River Park reported a gain of \$3.3 million (15.4% of NPR), up from \$658,000 (3.7% of NPR) in the prior year, and Highland reported a profit of \$43,000 (0.5% of NPR), down from \$357,000 (3.8% of NPR).
- Only River Park, a for-profit facility, has consistently reported profits on patient services for the last eight fiscal years. For FY 2009, River Park's income from patient services was \$3.2 million (14.9% of NPR).
- Highland's occupancy rate (46.9%) was the lowest of all four psychiatric hospitals. River Park reported an occupancy rate of 71.4%.

Financial items related to the state psychiatric hospitals included:

- Combined losses of \$2.3 million were reported for FY 2009. This was an improvement from the prior year's loss of \$4.0 million.
- Net patient revenue decreased by \$2.0 million, while operating expenses increased by \$3.8 million resulting in an increased loss on patient services.
- An increase in other operating revenue of \$7.5 million, which equaled \$64.7 million.
- Mildred Bateman, one of the two state hospitals, reported a loss of \$1.0 million. Sharpe, the other state facility, reported a loss of \$1.3 million.
- Combined deficits of \$67.0 million for patient services were reported. These operating losses were reduced substantially because of state appropriations as reflected in other operating revenue. The state hospitals operate at full capacity with extremely high levels of uncompensated care.

Rehabilitation Hospitals

In FY 2009 five rehabilitation hospitals operated in West Virginia. All five hospitals are for-profit facilities and four are owned and operated by HealthSouth, Inc. The remaining facility, Peterson Rehabilitation and Geriatric Center, is owned and operated by Guardian Eldercare. These hospitals have 420 licensed rehabilitation and/or skilled nursing beds in the state.

Items of note regarding the financial status of the rehabilitation hospitals included:

- For FY 2009 the rehabilitation hospitals reported an overall profit of \$19.3 million (20.4% of NPR), a \$1.6 million increase over the FY 2008 profit of \$17.8 million.
- Income from patient services accounts for 99.2% of the rehabilitation hospitals' profit levels.
- Net patient revenue increased by \$2.8 million, while operating expenses increased by \$1.0 million resulting in an increased income on patient services.
- Other revenue for FY 2009 was \$163,000, a decrease from \$325,000 in the prior year.
- An occupancy rate for FY 2009 of 84.2%.

QUALITY INDICATORS

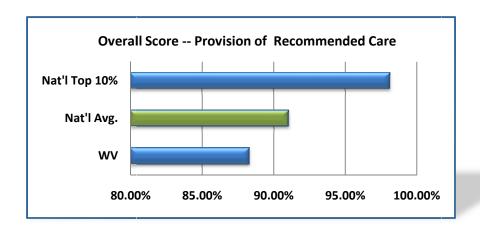

Every West Virginian needs access to affordable, quality health care. The West Virginia Health Care Authority (Authority) is working to provide information about how West Virginia hospitals are providing recommended treatments that are proven to be effective and prevent hospital readmissions for patients with certain medical conditions or require surgery.

Using data publicly available from the U.S Dept. of Health and Human Services (DHHS), the Authority developed *CompareCareWV*TM to provide information to help people understand how West Virginia hospitals are meeting national quality indicators that measure both processes and outcomes of care.

Process of care measures indicate how frequently hospitals provide recommended treatments in the areas of pneumonia care, heart attack care, heart failure care, and surgical infection prevention. Outcome of care measures evaluate mortality and readmissions for those diagnosed with heart attack, heart failure, or pneumonia. These measures indicate whether a hospital is preventing complications, teaching patients about self care at discharge, and ensuring patients make a smooth transition to their home.

West Virginia's scores for process and outcome of care measures were developed using The Commonwealth Fund's quality resource tool for tracking performance of health care quality, which also uses DHHS' data. The tool enables comparisons of performance against peer organizations and benchmarks over time. Utilizing the data from DHHS submitted by the hospitals, a total composite score was created. In all instances a weighted average was calculated, whereby all the numerators were added and divided by the total of the denominators.

Overall, West Virginia scored 88.26%, as compared to the national average of 91.01%, for providing recommended care in accordance with national care measures.

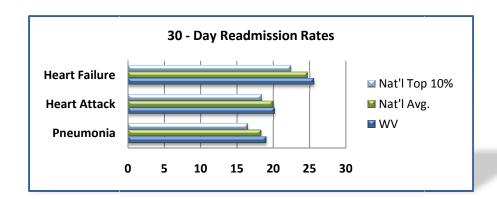

Hospital Readmission and Mortality Measures

Comparing West Virginia hospital readmission and mortality rates to national rates provides information about whether a hospital is effective in preventing complications, teaching patients about self care at discharge, and ensuring patients make a smooth transition to their home.

The hospital readmission rate reflects Medicare patients who are readmitted to a hospital within 30 days of discharge from a previous hospital stay for heart attack, heart failure, or pneumonia.

Mortality rates are also reported for Medicare patients, and include deaths within 30 days from all causes after an initial hospitalization for a principal diagnosis of heart attack, heart failure, or pneumonia. Both readmission and mortality rates consider how severely ill patients were when they were admitted for their initial hospitalization.

Although West Virginia's overall readmission and mortality rates rank higher in all three areas – pneumonia, heart attack and heart failure – they are very close to the respective national averages when the quality resource tool is used to compare the specific diagnoses.

WV hospitals' readmission and mortality comparisons are provided on Table 20. The information outlined on the table is provided from DHHS' Hospital Compare data and provides 30-day risk-standardized mortality and readmission measures for heart attack, heart failure, and pneumonia. Adjusting for patient-level risk factors and accounting for the clustering of patients within hospitals, DHHS uses a sophisticated statistical modeling technique to determine the rate and measure. These measures are then reported by hospital and compared to the U.S. National Rate.

In Table 20 WV hospitals are listed in relation to whether a facility's death rate or readmission rate was better than the national rate, the same as the national rate, or worse than the national rate given how sick patients were when admitted. For some hospitals, the numbers are too small (fewer than 25) to reliably reflect how those facilities are performing, or in some cases, no data is available from the hospital; therefore, no national rate comparison is listed.

^{*}To file a rate application based on the benchmarking methodology, a hospital must use this ranking to determine the increase it may request. The maximum rate is determined by averaging the percentages calculated from the charge and cost determinations. Only hospitals with fiscal years ending on 12/31/10, 6/30/2011, and 9/30/2011 used this ranking.

^{**}Adjusted by the hospital's FY 2008 all payor case mix index.

^{**}Medicare Severity Diagnosis Related Groups

^{***} Effective October 1, 2007, the Centers for Medicare and Medicaid Services (CMS) moved from diagnosis-related groups (DRGs). The Authority adopted the new MSDRG grouper Version 25 classification system, which results in greater definition and patient severity of illness reporting. Due to the significant change in classification systems data presented for 2007 include only the discharges for October - December, which utilized the MSDRG designations.

NURSING HOMES

The FY 2009 Annual Report of Nursing Homes included information from each of the 105 long-term care facilities that operated in the state. The data are provided as reported by the facilities. The largest ownership type, with 84 providers (80.0%), is the for-profit category. Sixty-five facilities are corporations and nineteen facilities are partnerships. The top four corporate entities that owned or operated nursing homes were:

- Genesis Health Care Corporation (25);
- Integrated Commercial Enterprises (11);
- The Carlyle Group (7); and,
- Sun Health Group (7).

The second largest ownership category included eleven not-for-profit corporations. Other ownership categories included four church related providers, two county owned entities and four state operated nursing homes: Hopemont, John Manchin Sr. Center, Lakin, and Pinecrest Hospital.

Three facilities were sold and one had a name change during the year:

- Springfield Center was purchased by Springfield Center, LLC on June 30, 2009.
- Pierpont Center (formerly known as Wishing Well Health Care) and Tygart Center (formerly known as Wishing Well Manor) began operations as Genesis facilities January 1, 2009.
- Shenandoah Health Village changed its name to Shenandoah Center in July 2009.

Aggregate utilization of 3.2 million days was reported for FY 2009. While this represents a 1.5% decrease from FY 2008, utilization has remained at the 3.0 million level since the late 1990s. Medicare and Medicaid comprised 12.2% and 74.8%, respectively, of total days. There were 9,873 licensed nursing home beds in FY 2009, a decrease of 195 beds from FY 2008. The facilities that accounted for the reduction in beds included Morris Memorial Nursing Home with 185 beds, which closed in December 2008, and Trinity Health Care Mingo, which de-licensed 10 beds effective April 1, 2009.

Financial indicators of note for the FY 2009 data included:

• Total profit was \$47.2 million (6.1% of NPR), a decrease of \$6.7 million from FY 2008.

EROE – Nursing Home (In thousands) Margin on Total Revenue

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
EROE	\$35,986	\$32,575	\$44,848	\$53,875	\$47,162
Margin	5.8%	5.0%	6.5%	7.4%	6.1%

- Other operating revenue fell to \$5.1 million, a decrease of \$16.6 million. The decrease was a return to typical levels of other revenue. In FY 2008 there were two significant gains on sales of assets for two facilities, Wishing Well Manor and Wishing Well Health Care Center, in the amounts of \$9.3 million and \$5.5 million, respectively.
- The decline in other operating revenue is primarily responsible for the decrease in total profits for FY 2009.

The nursing homes with the three largest EROEs are:

- Golden Living Center Morgantown experienced the largest profit of \$2.0 million. In FY 2008 the EROE was \$1.8 million.
- Hidden Valley Health Care Center reported an EROE of \$1.9 million, an increase of \$615,000 over the prior year.
- Sunbridge Care and Rehabilitation for Putnam reported a profit of \$1.8 million, a slight reduction from the prior year's EROE of \$1.9 million.

The nursing homes with the three largest losses are:

- Pinecrest Hospital, a state operated facility, reported a loss of \$4.6 million. The prior year's loss was \$4.3 million. This facility reported the largest loss for the fourth consecutive year.
- Hopemont Hospital, also a state operated facility, lost \$2.8 million. The loss reported in FY 2008 was \$882,000.
- Woodlands Retirement Community reported a loss of \$1.9 million, an increase of \$222,000 over the prior year's loss of \$1.7 million. Woodlands has reported progressively greater losses since FY 2006.

Other items of note regarding nursing home earnings include:

- After reporting gains for three consecutive years, Lakin Hospital, a state operated facility, reported a loss of \$568,000.
- John Manchin, Sr. Health Care Center, the fourth state operated facility, reported a modest gain after three consecutive years of reporting losses.
- Profitable facilities increased from 80 in FY 2008 to 86 in FY 2009.
- Seventy-four facilities (70.5%) experienced positive EROEs for the last three years while ten (9.5%) facilities reported losses all three years.

Additional financial elements related to the condition of nursing homes in FY 2009 included:

- Net patient revenue increases of \$36.4 million outpaced operating expenses by \$10.6 million. This is a reversal from FY 2008 when increases in operating expenses exceeded net patient revenue growth by \$6.1 million.
- Income from patient services was \$45.1 million, up from \$34.5 million over the previous year.
- Medicaid net patient revenue increases of \$24.5 million (5.2%) contributed 67.3% of the total growth in net patient revenues in FY 2009.

An evaluation of Medicare and Medicaid services data indicated:

- In FY 2009 Medicare services were provided by 96 facilities. Ninety (93.8%) of these experienced profits on these services. Income from patient services for Medicare was \$35.5 million, up from \$30.5 million in FY 2008. The same number of facilities served Medicare patients in FY 2008 with 85 reporting profits.
- Of the 104 facilities that provided Medicaid services in FY 2009, sixty-five (62.5%) reported profits on those services. Income from patient services was \$11.2 million, an increase of \$2.4 million over FY 2008. The same number of facilities offered Medicaid services in FY 2008 with 61 reporting profits.
- The margins for Medicare and Medicaid as a percent of net patient revenue were 21.5% and 2.2%, respectively.

Tables 21-24 provide detailed information for nursing homes.

EROE: Excess (Deficit) of Revenue Over Expense or Profit (Loss) after Tax

Ownership and Name Changes:

**Pierpont Center (formerly Wishing Well Manor) changed its name and Genesis assumed ownership as of January 1, 2009.

FY 2008 Non Operating Revenue includes \$9.3 million for Gain on Asset Sale to Genesis as of December 31, 2008

FY 2008 Non Operating Revenue includes \$5.5 million for Gain on Asset Sale to Genesis as of December 31, 2008

Ownership and Name Changes, Closures, and Facilities reporting less than 12 months of data:

The fiscal year changed from 6/30 to 12/31. Eleven months of data are reported (02/01/08 - 12/31/08)

Facilities that include significant personal care services are Woodlands Retirement Community; Pierpont Center; and Glenwood Park.

[~] Value is too small to register

^{*}Other Revenue includes Other Operating Revenue and Non-Operating Revenue

^{**}Shenandoah Center (formerly Shenandoah Health Village) changed its name July 2009

^{**}Springfield Center was purchased by Springfield Center, LLC June 30, 2009

^{**}Tygart Center (formerly known as Wishing Well Health Care Center) changed its name and Genesis assumed ownership as of January 1, 2009.

^{***}CareHaven of Pleasants was purchased by Pleasants-Carehaven Operating LLC, on July 1, 2007. Six months of data are reported (7/01/07 - 12/31/07).

^{***}Hidden Valley Health Care Center and Marmet Health Care Center were purchased by Genesis on December 1, 2006. Ten months of data are reported (12/01/06 - 9/30/07).

^{***}Mapleshire Nursing & Rehabilitation Center (formerly known as MonPointe Continuing Care Center) was purchased on February 1, 2008 by Morgantown SNF Acquistion LLC.

^{***}Willow Tree Manor (formerly known as Blue Ridge Nursing & Rehabilitation Center) was purchased by Blue Ridge Nursing, LLC, in August 2007. Five months of data are reported (08/01/07 - 12/31/07).

^{****}Woodlands Retirement Community has six licensed nursing home beds. Financial figures reported are for the entire facility.

HOME HEALTH

The FY 2009 Annual Survey of Home Health Services was completed by 63 home health agencies that serve West Virginia residents, including those agencies based in Kentucky, Maryland, and Ohio. The data are provided as reported by the facilities.

- Overall, home health agencies reported a profit of \$10.0 million.
- Thirty-five of the 63 agencies were profitable.
- FY 2009 is the first year home health agencies reported an aggregate profit since FY 2003.

EROE – Home Health (In thousands) Margin on Total Revenue

	FY 2004	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
EROE/(Loss)	(\$1,458)	(\$919)	(\$4,281)	(\$2,322)	(\$579)	\$10,059
Margin	(1.7%)	(1.1%)	(5.1%)	(2.8%)	(0.6%)	8.5%

Analysis of home health agencies by type of ownership shows mixed results. The agencies are classified by the following ownership categories:

- County-owned, proprietary and not-for-profit.
- Hospital-based agencies are discussed as a separate category because administrative expenses are typically allocated by the hospital which translates to an increase in operating expenses. Hospital-based agencies have historically reported the greatest losses.

Three agencies had a change in ownership during FY 2009:

- Gentiva purchased Nicholas-Webster (Health Department) Home Health;
- LHC Group purchased Jackson County (Health Department) Home Health Service and Preston Memorial Home Health.

As a result of acquisition by publicly traded companies, these agencies will move to the proprietary classification in next year's report.

Wetzel-Tyler Home Health Agency closed April 30, 2009.

County-owned

Financial items of note regarding county-owned agencies included:

- Eight agencies reported an aggregate loss of \$908,000 (36.1% of \$2.5 million in total revenue).
- Only one county-owned home health agency was profitable, with a gain of \$11,000 for FY 2009. The other seven agencies reported losses totaling \$919,000.
- Prior years' aggregate losses equaled \$650,000 in FY 2008; \$366,000 in FY 2007; and \$1.3 million in FY 2006.

Proprietary

Financial items related to the proprietary agencies included:

- Total profit of \$15.4 million (18.5% of total revenue) an increase of \$9.1 million over the FY 2008 profit of \$6.3 million (9.9% of total revenue).
- Twenty-three of the 30 proprietary agencies reported profits.
- Profits for FY 2007 and FY 2006 equaled \$3.5 million and \$5.1 million, respectively.

Not-for-profit

Information regarding the not-for-profit home health agencies revealed:

- Six agencies were operating in FY 2009 with aggregate earnings of \$46,000 (0.5% of total revenue).
- Five agencies were profitable, with a combined EROE of \$202,000 (4.0% of total revenue).

Non-Profit Hospital-based

Items of note regarding the not-for-profit hospital-based agencies showed:

• Eighteen agencies operated in FY 2009 with continued aggregate losses of \$5.2 million (23.6% of total revenue).

- Prior years' losses were \$6.8 million in FY 2008; \$6.5 million in FY 2007; and \$8.5 million in FY 2006.
- The number of agencies reporting losses in FY 2009 outnumbered profitable agencies 13 to 5.

Proprietary Hospital-based

Three Rivers Home Care is the only proprietary hospital-based agency still operating in West Virginia. Owned by Three Rivers Medical Center in Louisa, Kentucky, the home health agency reported a profit for FY 2009 of \$685,000 (72.8% of total revenue).

Table 25 provides detailed information for home health agencies.

HOSPICE

The Health Care Authority collected data from 20 West Virginia hospice organizations using the Annual Hospice Survey. Hospice agencies are categorized based on organizational structure: free-standing (13); hospital-based (6), and home health-based (1).

Information submitted for FY 2009 provided the following:

• Total profit was \$3.8 million (4.0% of NPR), an increase from \$449,000, (0.5% of NPR), in FY 2008.

EROE – Hospice (In thousands) Margin on Net Patient Revenue

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
EROE	\$5,734	\$9,133	\$8,333	\$449	\$3,767
Margin	11.0%	13.7%	10.6%	0.5%	4.0%

- Net patient revenue was \$93.8 million, an increase of \$5.5 million (6.2%) from the previous year.
- Operating Expenses equaled \$95.3 million, an increase of \$3.5 million (3.8%).
- The larger increase in net patient revenue relative to the increase in operating expense resulted in a reduction of the losses on patient services by \$2.0 million.

Aggregate Income/(Loss) on Patient Services – Hospice (In thousands)

Margin on Net Patient Revenue

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
EROE/(Loss)	\$1,822	\$3,463	\$3,393	(\$3,467)	(\$1,467)
Margin	3.5%	5.2%	4.3%	(3.9%)	(1.6%)

- Other and non-operating revenues were \$5.2 million in FY 2009, an increase of \$1.3 million over the prior year. Non-operating revenues include contributions from fundraising campaigns and other donations.
- Of the 20 agencies reporting, nine reported losses in income from patient services. Of those agencies reporting a loss from patient services, three had positive EROEs as a result of other and non-operating revenue.
- The number of patients served increased by 8.1%; total patient days increased by 7.7%.
- Eight free-standing agencies, four hospital-based agencies, and the home-health based agency reported profits.

Table 26 presents hospice data for FY 2009.

Behavioral Health Facilities Section Table of Contents

	Summary	
Table		
Table 27	FY 2007-09 Revenue and Expense by Facility	106

BEHAVIORAL HEALTH

Ninety-seven behavioral health providers operated in the state in FY 2009. The data for this reporting period are classified into three sections.

- Comprehensive Behavioral Health Centers;
- Other Behavioral Health Providers; and
- Methadone Treatment Centers.

The number of behavioral health providers continued to change during FY 2009. Two new entities began providing services. New Horizons Therapy Services received its initial behavioral health license in August 2009. Yore Academy was incorporated in June 2008 and acquired its license in January 2009. ResCare, the parent organization of RSCR, WV and VOCA, acquired the behavioral health services of Green Acres Regional Center in FY 2009. Green Acres remained in business and provided supported employment services; however, these services do not require a behavioral health license.

Comprehensive Behavioral Health Centers

Thirteen regional comprehensive behavioral health centers continued to operate in FY 2009. These providers offered a full array of services including crisis services; linkages with inpatient and residential treatment facilities; diagnostic and assessment services; provision of support services and treatment services.

A review of the financial data for the Comprehensive Centers indicates:

• Total profit was \$905,000 (0.5% of total revenue), a decrease of \$1.9 million from the prior year.

EROE – Behavioral Health - Comprehensives
(In thousands)
Margin on Total Revenue

	FY 2006	FY 2007	FY 2008	FY 2009
EROE/(Loss)	\$952	\$2,488	\$2,811	\$905
Margin	0.6%	1.5%	1.6%	0.5%

- Prestera Center, while reporting net income of \$486,000 (1.3% of total revenue), was responsible for 74% of the overall decrease in profit for the Comprehensive Centers.
 Prestera's increase in revenue of \$1.1 million was outpaced by expense increases in salaries and benefits of \$2.0 million, and bad debt of \$489,000.
- Northwood Health Systems reported the largest net income of \$885,000 (3.8% of total revenue), which equaled 97.7% of the Comprehensive Center's combined profit for the year.
- Southern Highlands reported the largest loss of \$381,000 (3.6% of total revenue).

Seven facilities reported profits in FY 2009, two fewer than in the prior year. Six of these providers showed profits for the last three consecutive years. Losses were reported by six comprehensives, with four of these entities experiencing losses all three years.

Other Behavioral Health Providers

There were seventy-five behavioral health providers that offered specialized services during FY 2009. These services focused on residential treatment, case management, waiver, counseling or a combination of services.

The financial condition of the other, non-comprehensive providers included:

Aggregate profits of \$19.8 million (5.0% of total revenue) equaled an increase of \$8.0 million from FY 2008.

EROE – Behavioral Health - Other
(In thousands)
Margin on Total Revenue

	FY 2006	FY 2007	FY 2008	FY 2009
EROE	\$5,317	\$14,175	\$11,806	\$19,787
Margin	1.6%	3.9%	3.1%	5.0%

- Total revenue growth of \$24.2 million (6.5%) outpaced an increase in operating expenses of \$16.3 million (4.5%).
- Four providers were responsible for 60.9% of the total growth in profits: Burlington United Methodist Family Services; Charles Cammack Children's Center; Children's Home Society; and VOCA Corporation of West Virginia. A review of the financial statements

indicates increases in client revenues and service fees for program services were the major factors for the growth in total profits.

- There were eight centers earning more than \$1.0 million dollars in FY 2009, up from four in FY 2008.
- The top three profitable centers were: VOCA Corporation of West Virginia (\$7.1 million);
 RSCR of WV (\$5.3 million); and, Burlington United Methodist Family Services (\$2.0 million).
- The largest loss of \$1.4 million was reported by the Board of Child Care as total expenses continue to outpace the increase in revenue. This is the fifth consecutive year this provider has reported a loss greater than \$1.0 million dollars.
- Forty-one facilities reported profits, one more than in FY 2008. Twenty-two of these providers reported profits for the last three consecutive years.
- Seventeen facilities reported losses two of the last three years. Eight reported losses for all three years.

Methadone Treatment Centers

In FY 2009, nine licensed methadone treatment centers operated in the state.

Financial items of note for the treatment centers included:

 Aggregate profit was \$7.9 million (36.2% of total revenue of \$21.8 million) an increase of \$1.2 million from the prior year.

EROE – Behavioral Health – Methadone Treatment (In thousands) Margin on Total Revenue

	FY 2006	FY 2007	FY 2008	FY 2009
EROE	\$5,718	\$6,101	\$6,648	\$7,883
Margin	27.6%	29.7%	32.8%	36.2%

• Total expenses increased by \$284,000 (2.1%), while total revenues grew by \$1.5 million (7.5%). As revealed in the financial statements, the majority of the growth was attributed to a 4.2% increase in service fees from \$18.9 million in FY 2008 to \$19.7 million in FY 2009.

- Profits were reported by each center in FY 2009. Four reported profits of over \$1.0 million: Huntington \$2.1 million (most profitable for the fourth consecutive year), Beckley \$1.6 million, Williamson \$1.5 million and Charleston \$1.3 million.
- The smallest profit for the year was \$71,000 reported by Valley Alliance Treatment Services which completed its first full year of operation.

Table 27 provides detailed information for the behavioral health facilities.

^{*}Yore Academy was incorporated in June 2008 and was initially licensed January 7, 2009.

^{**}Alldredge Wilderness Journey closed December 2008.

^{**}Evergreen Behavioral Health closed in November 2008

^{***}Green Acres Regional Center's behavioral health license was acquired by ResCare in August 2008 (FY 2009).

^{***}Greenbrier Academy for Girls formerly known as The Greenbrier Academy was operated by two companies during FY 2009: (The Greenbrier Academy Charitable Trust (January 1 - November 30), and Relational Management Sevices, LLC (beginning December 1).

Renal Dialysis Centers Section Table of Contents

	Summary	
Tables		
Table 28	FY 2009 Revenue and Expense by Facility	113

RENAL DIALYSIS CENTERS

Renal dialysis centers are distinct entities that provide treatment for patients in kidney failure. This is the second year of reporting information for renal dialysis centers. The FY 2008 data was updated from the prior report to include two additional centers.

- Twenty-six renal dialysis centers operated in West Virginia during FY 2009.
- All dialysis centers are for-profit entities.
- Total revenue for FY 2009 was \$94.6 million, with expenses of \$66.8 million resulting in an aggregate profit of \$27.8 million.
- The prior year's total revenue was \$89.2 million; operating expenses were \$65.9 million, with an aggregate profit of \$23.3 million.
- Total margin for FY 2009 was 29.4%, an increase from 26.1% in FY 2008.
- Twenty-two facilities reported profits for FY 2009 ranging from \$43,000 to \$4.9 million. Average profit was \$1.1 million. For FY 2008 profits ranged from \$64,000 to \$6.3 million, with an average profit of \$932,000.

AMBULATORY SURGERY CENTERS

Ambulatory surgical centers (ASCs) are distinct entities that provide surgical services to patients not requiring a hospital admission.

- Eleven certified ASCs operated in West Virginia during FY 2009.
- All ASCs operated as for-profit entities.
- Total revenue for FY 2009 was \$26.9 million, with expenses of \$21.6 million resulting in an aggregate profit of \$5.3 million.

EROE – Ambulatory Surgery Centers (In thousands) Margin on Total Revenue

	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009
EROE	\$4,091	\$5,200	\$5,200	\$5,733	\$5,316
Margin	18.7%	21.7%	21.7%	22.4%	19.7%

- Average profit was \$591,000 for FY 2009.
- For FY 2009, nine facilities reported profits; one reported a loss; the remaining center reported a zero margin.

Tables 29 and 30 show financial and utilization data for the ASCs.

GLOSSARY OF TERMS

Accounts Payable: Amounts owed to others for goods, services, and supplies purchased and received, but not yet paid for as of the balance sheet date.

Accumulated Depreciation: Amount charged to expense through the annual amortization of the cost of the property, plant, and equipment.

Bad Debt: Amount not recoverable from a patient following exhaustion of all collection efforts.

Capital Lease Obligations: Consists of a portion of the long-term debt obligations incurred for leased items such as equipment and other long-lived assets when leases meet criteria necessary for being capitalized.

Cash: Money in the bank available for immediate expenditure. This may include cash equivalents which are financial instruments that may be readily and quickly converted into cash.

Charity Care: Uncompensated care given by a health care facility to indigent and medically-indigent people as part of a written mission or charity care policy. It does not include accounts written off as "bad debts" or thirty-party adjustments, including those for Medicare and Medicaid. This represents health care services accounted for on the accrual basis which were provided, but were never expected to result in cash inflows.

Contractual Allowance: Accounting adjustment to reflect uncollectable differences between established charges for services rendered to insured persons and rates payable for those services under contracts with third-party payors. The amount of the discount from total charges negotiated by the health care provider with an insurer for the provision of health care services. Or, the difference between total charges and the reimbursement allowed by a governmental payor.

Critical Access Hospital: Rural acute care hospital with no more than 25 licensed beds consisting of acute care beds and/or swing beds. The average length of stay must not exceed 96 hours. The Critical Access Hospital has emergency services available 24 hours and agreements, contracts or affiliations for transfer and services.

Current Maturities of Long Term Debt: Amounts payable on bonds, mortgage loans, capital lease obligations, and other long-term debts to be paid in the next 12 months.

Derivative Agreement: A financial instrument that is derived from some other asset, index, event, value or condition (known as the underlying asset). Rather than trade or exchange the underlying asset itself, derivative traders enter into an agreement to exchange cash or assets over time based on the underlying asset.

Diagnosis-related Groups (DRGs): Classifications in a system to group patients by diagnosis, type of treatment, age, and other relevant factors. Hospitals are paid a set fee for treatment of patients in each DRG category regardless of resource utilization (within limits) under this prospective payment system.

Diagnosis-related Group (DRG) Case Weight: Measure of the relative average expected resource utilization or costliness of patient care in a particular DRG in comparison to the average costliness of all DRGs. A case weight of 1.0000 is given to a DRG with expected resource consumption equal to that of the average of all DRGs.

Employment Retirement Income Security Act (ERISA) of 1974: A federal law which established rules for pension and retirement plans, which excluded states from regulating these plans. The majority of health plans in the US are covered by ERISA, and therefore exempted from certain regulations. Only federal courts have jurisdiction for lawsuits against ERISA covered plans.

Excess Revenue (Deficit) Over Expenses (EROE): Bottom line measure of residual income or (loss) that is generated from the aggregate revenues, expenses, gains, and losses of the facility due to the overall activities of the facility.

Fund Balance and/or Equity: Consists of tax-exempt corporation fund balances and proprietary corporation owner's equity including capital invested and retained earnings.

Goodwill: Additional value above fair value of an entity, creating an intangible asset, which is attributed to an organization for a perceived competitive advantage due to outstanding reputation, employee morale, or potential synergy with a purchasing entity.

Gross Patient Revenue (GPR): Amount charged by the facility for services provided to patients. It is the standard charge made by the facility before discounts and contractual allowances.

Income (Loss) from Patient Services: Equals net patient revenue less operating expenses. Net patient revenue only includes payments for patient services rendered, it does not include other operating or non-operating revenues.

Inventory: Cost of supply items on hand that will be used in the next period. It may consist of medical supplies, surgical supplies, pharmaceutical supplies, food, and other supplies.

Long Term Acute Care Hospital (LTCH): Acute care hospital that provides care for patients who have been in an intensive care or short-term care setting and who require an extended length of stay (greater than 25 days). LTCHs are often referred to as a "hospital within a hospital".

Long-term Debt: Consists of notes payable to banks, revenue bonds payable, and, in some cases, capital lease obligations due to be paid at a date more than one year in the future.

Major Diagnosis Category (MDC): Grouping of DRGs in a higher category of medically related system classifications.

Margin: The percentage of revenue or net income that has been realized after expenses.

Medicare Severity Diagnosis Related Groups (MSDRG): Classification system which groups inpatient discharges by principal and secondary diagnosis. System became effective as of 10/1/07 replacing the DRG classification system.

Net Patient Receivables: Amounts owed by patients less contractual adjustments and estimated allowances for bad debt.

Net Patient Revenue (NPR): Amount the facility receives or expects to receive from patients and/or third-party payors for the services provided by the facility less contractual adjustments, and allowances for Charity Care and Bad Debt.

Net Property, Plant, and Equipment: Remaining book value of physical assets such as buildings and equipment after subtracting accumulated depreciation.

Non-operating Revenue: Amounts the facility receives from items that are neither directly nor indirectly the result of treating patients or other operating activity. Examples of revenue in this category are investment income and donations.

Other Assets: Items not expected to be expended in the current period, but with limited use due to restrictions. These consist of items such as funds held for bond indenture requirements, investments for self-insured malpractice, and hospitalization programs.

Other Current Assets: Items expected to be expended during the current period. These consist of items such as short-term investments and current portion of assets.

Other Current Liabilities: Accrued expenses for wages and salaries, benefits, and interest.

Other Liabilities: Consists of items such as liabilities for self-insured malpractice, employee benefit programs (pension and health care), and inter-company payables for affiliated facilities.

Other Operating Revenue: Amount the facility receives from sales of items not directly resulting from treating patients. It includes items such as cafeteria sales and the sale of copies of medical records.

Other Receivables: Receivables from revenue sources other than patients. The receivable may consist of settlement amounts due from Medicare, Medicaid, or from other parties.

Other Revenue: Other operating revenue plus non-operating revenue.

Payor: The person, government body, or public or private organization that is responsible for payment of health care expenses. Payors include insurance companies and self-insured employers.

Pre-tax Income: Revenues minus expenses before income tax, and may also exclude extraordinary items.

Prepaid Expenses: Amounts already paid for the cost of items that will be expended in the current period. The prepaid expenses may consist of items such as prepaid insurance.

Property, Plant, and Equipment: Historical cost of land, buildings, and equipment owned by the facility. It may also include capital leases, which are leases for the approximate life of the asset.

Renal Dialysis: A process that filters the blood, the way kidneys do when functioning normally, using a special machine. The filtration rids the blood of waste products then returns it to the patient through a venous catheter.

SFAS 142: Statement of Financial Accounting Standards (SFAS) 142, *Goodwill and Other Intangible Assets*. This Statement addresses how entities are to account for intangible assets at acquisition and after initial recognition.

SFAS 159: Statement of Financial Accounting Standards (SFAS) 159, *The Fair Value Option for Financial Assets and Financial Liabilities*. This Statement allows entities to report certain financial instruments at fair value, and avoid employing complex hedge accounting practices.

Swing Bed: Beds certified by Medicare for use in small hospitals as either general medical/surgical or skilled nursing beds with reimbursement based on the specific care provided. Swing beds provide small hospitals with greater flexibility to meet fluctuating demands for inpatient hospital and skilled nursing care.

Total Assets: Total of all assets listed in the balance sheet.

Total Liabilities: Total of all liabilities listed on the balance sheet.

Total Liabilities and Fund Balances and/or Equity: Summation of the total liabilities and fund balance or equity shown on the balance sheet.

Total Operating Expenses: Amount recorded by the facility for items purchased or accrued as normal operating expenses. It includes, but is not limited to, items such as salaries, employee benefits, medical supplies, utilities, depreciation, interest on debt, income and provider taxes (if applicable), and all other necessary supplies.

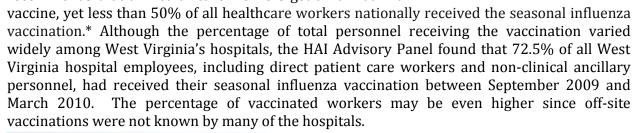

Uncompensated Care: Amount of patient care provided without compensation or reimbursement, consisting of charity care and bad debt. Contractual allowances are not included.

West Virginia Healthcare-Associated Infections Seasonal Influenza Vaccinations Among Hospital Employees

Health care workers play an important role in protecting public health. Those who have been vaccinated not only protect their families, but also the patients they help while at work. Since health care workers may care for or live with people at high risk for influenza-related complications, it is especially important for them to get vaccinated annually.

As a result of legislative direction, the West Virginia Health Care Authority organized the West Virginia Healthcare-Associated Infection (HAI) Control Advisory Panel to develop guidelines for reporting and release of information on infections that are acquired among patients admitted to the hospital. One of the first projects developed by the HAI Advisory Panel was to review the seasonal influenza vaccination rates among hospital employees.

The Centers for Disease Control and Prevention (CDC) recommends that all health care workers get an annual flu

West Virginia hospitals recognize that seasonal influenza vaccinations are important not only in the prevention of illness and provision of quality health care for patients, but in the prevention of influenza infection among staff.

The Authority and the HAI Advisory Panel will continue to monitor seasonal influenza vaccinations of healthcare workers in the coming year.

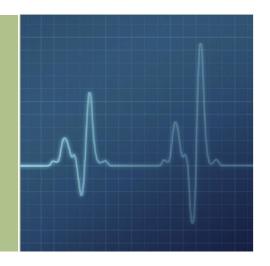

For more information on projects of the HAI Advisory Panel, visit the Infection Control Panel section of the

West Virginia Health Care Authority website, www.hcawv.org.

*Centers for Disease Control and Prevention. Influenza vaccination of health-care personnel: recommendations of the Healthcare Infection Control Practices Advisory Committee (HICPAC) and the Advisory Committee on Immunization Practices (ACIP). MMWR 2006; 55 (No. RR-2):1-13

All West Virginians will have appropriate access to a continuum of affordable, quality, coordinated health care services.

Mission

The West Virginia Health Care Authority will work with public and private sector entities to:

- Protect citizens from unreasonable increases in the cost of health care services;
- Assure the collection, analysis and dissemination of health related information to citizens, providers, policy makers and other customers;
- Promote appropriate distribution of health care services; and,
- Promote the financial viability of the health care delivery system.
