THE HEALTH CARE COST REVIEW AUTHORITY

In 1983, the Legislature created the Health Care Cost Review Authority (HCCRA) as an autonomous agency within state government, charged with the responsibility of gathering information on health care costs, developing a system of cost control and ensuring continued accessibility to appropriate acute care services. The Legislative findings state that the citizens were to be protected from unreasonable increases in the cost of acute care hospital services and the unreasonable loss of economic resources. In keeping with these goals, the Legislature authorized the HCCRA to administer two previously enacted cost containment programs: The Certificate of Need (CON) program, originally enacted in 1977; and the Health Care Financial Disclosure Act, originally enacted in 1981.

In 1995, the Legislature expanded the responsibilities of the HCCRA by authorizing the agency to make necessary amendments to the State Health Plan and expanded the budget of the agency to include an audit division, to ensure compliance with rate orders, CON orders and the periodic review of health care entities experiencing financial difficulty.

In 1996, the Legislature further expanded the agency's responsibilities to include the administration of the Rural Health Systems Program. This program, administered jointly with the Office of Community and Rural Health, permits the HCCRA to offer both financial and technical assistance to the State's rural health care systems.

Therefore, the HCCRA's statutory duties include the following:

- (1) Protecting the citizens from unreasonable and possibly unnecessary increases in the cost of acute care hospital services and deterring cost shifting through review of discount contracts and rates for nongovernment payors;
- (2) Determining if proposed health care services, new construction, renovations and purchases of major medical equipment are needed, financially feasible and consistent with the State Health Plan through the CON program;
- (3) Gathering, reporting, analyzing, and maintaining financial information on a wide range of health care facilities through the Health Care Financial Disclosure Act;
- (4) Implementing health planning through the State Health Plan; and,
- (5) Providing economic and technical assistance to rural health systems through the Rural Health Systems Program.

PROGRAMS AND AGENCY ADMINISTRATION

The programs administered by HCCRA generally have two primary purposes: to constrain the rising cost of health care and to assure reasonable access to necessary health services. In the Rural Health Systems Program and CON standards, access to necessary health service is reviewed. To accomplish these goals, programs such as Rate Review and CON can demonstrate quantitatively some of the costs they constrain. Health Care Financial Disclosure and Health Planning programs can only draw logical implications on how those programs work to constrain costs. Additionally, the HCCRA assures public access to the information compiled under its programs, and publishes a newsletter detailing applications received and processed.

The following is a brief description of the statutorily created programs administered by the HCCRA and some indications of the programs' effectiveness:

Hospital Rate Review. W.Va. Code §§ 16-29B-19, 19a and 20.

The stated purpose of developing a rate-setting system was cost containment of acute care hospital services. The original "revenue-based" system was changed to a "cost-based" system in 1993. The regulations to implement this system are contained in the C.S.R. §§ 65-5-1 et seq. The focus of the cost-based system is the "determination of revenues which determine the rates to be charged to nongovernmental payors." C.S.R. § 65-5-4. These rates are characterized as the average charge per discharge (inpatient services) and the average charge per visit (outpatient services).

Each acute care hospital submits an annual rate application in which it provides the information needed (expense, revenue and utilization data) to establish an approved rate for its next fiscal year. The statute requires the HCCRA to establish the revenue limits and set the rates prospectively. The legislative rule permits the hospitals to adjust their schedule of rates throughout the fiscal year in order to remain within their approved revenue limits. If a hospital exceeds its approved revenue limits and cannot justify that increase as permitted by statute and rule, the amount of the increase is generally deducted from the next year's allowable charges. In this manner, the purchasers of health care services (or classes of purchasers) who were harmed when the hospital exceeded its allowable revenue limits are benefited by the decrease in the approved rates for the next fiscal year.

In conjunction with the rate review activities, the statute directs the HCCRA to review all discount contracts between hospitals and third party payors. The stated concern was the possibility of cost shifting, which can occur when large percentage discounts are granted to one payor while increasing the charges to other payors to make up the difference. The statute prohibits cost shifting; therefore, the HCCRA can only approve those contracts in which the hospital can demonstrate that none will occur.

The rate review activities provide another avenue for requiring accountability in health care costs by requiring hospitals to (1) detail the costs from previous years; (2)

propose a budget for the next fiscal year; (3) describe cost saving measures implemented since the last rate request; (4) justify any increase in rates; (5) advertise the increase requested; (6) subject their data to examination by the public, payors and agency staff; and (7) if requested, defend their requests in a public hearing.

Program Administration

The rate review program is to be administered in a manner that protects the citizens of West Virginia from paying unreasonable rates for health care services at acute care facilities. The following is a (1) a synopsis of rate review increases compared to the rates requested, and (2) a comparison of West Virginia rates to those of selected states.

1. Rate Requests

Average Rates Requested

Inpatient

<u>FY</u>	Average Amount <u>Requested</u>	Average Amount <u>Granted</u>	% Difference
96	\$5,383	\$5,255	(2.38)%
95	5,092	4,882	(4.24)%

³ Census Bureau.

⁴ The Almanac of Hospital Financial and Operating Indicators 1996-97 Edition pg. 185.

⁵ The Almanac of Hospital Financial and Operating Indicators 1996-97 Edition pg. 257.

Outpatient

<u>State</u>	Managed Care Penetration %	1996 Estimated <u>Population</u>	Gross Price <u>Per Visit⁶</u>	Cost Per <u>Visit⁷</u>
Maryland	Over 24.3%	5,072,000	\$232	\$207
West Virginia	0.0% - 6.9%	1,884,000	267	173
Kentucky	7.0% - 16.1%	3,884,000	318	226
Ohio	16.2% - 24.3%	11,173,000	388	265
Virginia	7.0% - 16.1%	6,675,000	322	176
Pennsylvania	16.2% - 24.3%	12,056,000	395	207
Texas	7.0% - 16.10%	17,046,000	385	267
United States	16.2% - 24.3%	265,284,000	334	217

This comparison indicates that West Virginia, despite having the lowest managed care penetration percentage, had the second lowest **gross price** per discharge and visit, and the second lowest **cost** per discharge and the lowest **cost** per visit. It should be noted that (1) Maryland is the only state with an "all payor rate system"; and (2) Pennsylvania and Virginia do not have rate-setting programs and had only limited CON programs in 1995⁸.

As previously stated, "rate review" is somewhat of a misnomer. The HCCRA does not set rates for individual procedures, although it must be notified and must approve all changes in hospital charges. The HCCRA does not set or compare individual DRG rates but the hospital must demonstrate to the HCCRA that the combined average charge for all patient services will not exceed the revenue limits set by the HCCRA. Under the cost-based system, the HCCRA establishes revenue limits for inpatient and outpatient hospital services for nongovernment payors. Penalties may be assessed if a hospital exceeds its revenue limits without justification within the confines established in statute and rules.

The statutory purpose given for "rate-setting" is cost-containment and to prevent

⁶ The Almanac of Hospital Financial and Operating Indicators 1996-97 Edition pg. 197.

 $^{^{7}\,}$ The Almanac of Hospital Financial and Operating Indicators 1996-97 Edition pg. 263.

⁸ Pennsylvania inadvertently sunset its CON program in late 1996, the effects of which are still undetermined.

cost-shifting amongst payor classes. This is important in that 76% of employers in West Virginia have fewer than 20 employees, which severely limits their ability to use volume to negotiate favorable contracts with providers and payors.

The HCCRA also uses "rate-setting" to monitor the hospitals during health care market changes.

Certificate of Need. W. Va. Code §§ 16-2D-1 et seq.

Certificate of Need programs are often associated with cost containment measures. However, the Legislative findings in our statute declare the need for health services to be provided in an orderly, economical manner that discourages unnecessary duplication.

Although some states have repealed their CON statutes, thirty-six (36) states and the District of Columbia retain some form of review. Of that number, three limit their review to long-term care. The structure of the programs varies widely, with some states using other regulatory mechanisms instead of or in conjunction with CON programs.

In West Virginia, all health care providers, unless otherwise exempt, must obtain a CON before (1) providing or expanding new health care services; (2) exceeding the capital expenditure threshold of \$750,000; or (3) obtaining major medical equipment valued at \$300,000 or more.

The statutorily mandated review process includes determination of need, consistency with the State Health Plan and financial feasibility. "Need" is based on CON Standards, which generally include population-based quantifiable need methodologies. Financial feasibility includes evaluations of the reasonableness of proposed charges to patients, and determinations as to whether the expense and revenue projections demonstrate fiscal viability with the implementation of the proposed project.

CON programs are noted for being effective in encouraging the rational distribution of health care services, particularly by limiting purchases of new technology. States that have eliminated CON programs report that expensive new technology is purchased as soon as it is available, while states retaining their CON programs report being able to control costs and placement by delaying purchases until lower cost and more efficient generations are available.

The "public aspect" of CON programs are that they encourage accountability by providing an avenue for public comment; discourage or limit unnecessary services; and promote community planning. In West Virginia, the CON program may offer some protection for small rural hospitals and the underinsured population they serve by ensuring the availability and accessibility of services and to some extent the financial viability of the facility.

CON and Managed Care

Although the goal of the CON program is to allocate scarce resources and prevent rapid growth of unneeded or duplicated services, it has been argued that a mature managed care market would serve the same function. Theoretically, in such a market, providers would be discouraged from buying, building or initiating unnecessary, inefficient or duplicative projects. However, it should be noted that "managed care" is a term that covers a diverse group of employer/employee/provider arrangements; therefore, it may be necessary to determine the types of managed care arrangements, the portion of the market served by those arrangements and the attributes of the population covered by those arrangements in order to determine which types promote efficient market forces. In 1995, approximately 7% of the citizens of West Virginia were enrolled in managed care programs, the majority of whom were covered by governmental payors.

The following tables show the relationship of managed care and CON regulation in all states and the District of Columbia⁹:

% of <u>Managed Care</u>	# of <u>States</u>	# of States <u>With Con</u>	% of Total States with CON
0.0 to 6.9%	12	8	66.70%
7.0 to 16.1%	14	11	78.60%
16.2 to 24.3%	15	12	80.00%
24.3% and up	<u>10</u>	<u>6</u>	<u>60.00%</u>
Total	51	37	72.50%

Range of CON Dollar Amounts

% of <u>Managed Care</u>	Capital <u>Expenditures</u>	Equipment <u>Expenditures</u>	New <u>Services</u>
0.0 to 6.9%	\$ 500,000 to \$1,500,000	\$300,000 to \$1,000,000	\$0 to Any
7.0 to 16.1%	500,000 to 5,000,000	400,000 to 1,567,500	\$0 to Any
16.2 to 24.3%	1,000,000 to 5,000,000	600,000 to 2,000,000	\$0 to Any
24.3% and up	1,000,000 to 8,668,395	400,000 to 1,300,000	\$600,000 to Any

(The above managed care penetration rates are for 1995, all other data are for 1996.)

West Virginia is ranked in the lowest category of managed care penetration. In 1996, our CON thresholds were \$750,000 for capital expenditures and \$300,000 for major medical equipment, ¹⁰ which were consistent with other states in the same managed care penetration rate category. As the states' managed care market increases, the percentage of states with CON increases until the market penetration is over 24.3%.

⁹ "Report to the Georgia State Health Planning Agency and the Georgia Certificate of Need Program", December 1995 and American Health Planning Assoc. Eighth Edition, December 24, 1996.

 $^{^{10}}$ These thresholds were raised during the 1997 Legislative session to \$1,000,000 and \$750,000 respectively, which will be consistent with the thresholds in the next managed care penetration category.

Health Planning. W. Va. Code § 16-2D-5

The HCCRA, through its health planning responsibilities, leads the development of the State Health Plan prior to submission to the Governor for approval. The plan establishes overall health care goals and objectives for the State. As part of the effort, the HCCRA planning staff develops Certificate of Need Standards that are used to determine whether a proposed service, equipment acquisition or major capital expenditure is needed.

The planning efforts of the HCCRA are intended to enable the health care system in the state to develop in an organized, cost-effective manner that includes sufficient resources to meet the health care needs of the residents of the State.

Program Administration

During 1996 the HCCRA reviewed and developed new standards for Home Health, Behavioral Health, and Renovations-Replacement of Acute Care Facilities and Services. The HCCRA has started to look at long-term care in West Virginia.

Health Care Financial Disclosure. W.Va. Code §§ 16-5F-1 et seq.

The HCCRA is responsible for the collection of information required under the Health Care Financial Disclosure Act. Only hospitals and nursing homes were required to report until the Act was amended in 1991 to include kidney disease treatment centers, ambulatory health care facilities, ambulatory surgical facilities, home health agencies, rehabilitation facilities, health maintenance organizations, behavioral health centers, related organizations, and in 1996 to include hospice.

All covered facilities and related organizations must file financial statements annually. All except ambulatory health care facilities which are primary care centers must also submit the following:

- (1) Statement of services available and rendered
- (2) Approved budget
- (3) Schedule of current rates for all patient services
- (4) Copies of Medicare, Medicaid and any other cost reports required to be filed with governmental funding agencies
- (5) Statement of charges, fees and salaries in excess of \$55,000 paid for goods or services
- (6) Statement of charges, fees and other sums in excess of \$55,000 collected by the facility
- (7) If applicable, a copy of Form 10K filed with the Federal Securities and Exchange Commission
- (8) Copies of all contracts entered into by the facility with any individual or group of health care providers
- (9) Copies of all income tax returns and applicable substitutes

(10) Copy and proof of publication of a Class I legal advertisement, to include a statement of revenue and expenses, balance sheet, statement of changes in retained earnings and a statement of ownership

In lieu of the statement of services, nursing homes must complete and submit the Annual Report of Nursing Homes which contains utilization and rate data by payor group, and hospitals must submit the American Hospital Association Annual Survey. In addition, hospitals must complete the Uniform Financial Report (UFR), which contains detailed utilization, revenue and expense, and wage and salary information. Hospitals must also submit a trial balance and a copy of the Uniform Bill (UB) for each inpatient discharged from a hospital.

Program Administration

The data collected from the financial filings are used to compile the annual report required by the Legislature. The information is also used in the Rate Review and CON programs pursuant to the review of respective applications. All of the information collected is available for public inspection, with the exception of tax forms and any UB data that directly or indirectly identifies patients.

In addition to the financial review, the health care provider information is useful in identifying gaps in needed services, trends in health care and quality issues. The information is essential for policy-makers as a tool in identifying the utilization, supply and distribution of health care resources. Data from the filings are compiled and provided to the public upon request. The program responds to approximately 500 data requests a year.

The Rural Health Systems Program. W. Va. Code § 16-2D-5

During the 1996 Legislative session, the HCCRA and the Bureau of Public Health, Office of Community and Rural Health, were given this program to administer jointly. This program provides assistance to probably the most fragile aspect of the State's health care system - rural health care. Through technical assistance, grants, and loans, the program helps rural communities integrate and strengthen their health care delivery systems to assure people of the community reasonable access to necessary health care services.

Program Administration

Grants, loans and technical assistance are available to financially vulnerable health care facilities located in underserved areas. Applicants must demonstrate a collaborative effort with other community health care entities in the provision of cost-effective health care services. This program should help maintain access to health care in rural communities.

The following applicants received funding in 1996:

Entity	County	<u>Type</u>	<u>Purpose</u>	<u>Amount</u>
Webster County Memorial Hospital	Webster County	Planning Grant	EMS	\$ 15,000
Richwood Area Community Hospital	Nicholas County	Grant/Loan	Cash flow	\$104,000
Pleasant Valley Hospital	Mason County	Planning Grant	EMS	\$ 15,000
Minnie Hamilton Health Center	Calhoun County	Grant	Various	\$130,484
Sistersville General Hospital	Tyler County	Grant/Loan	Convert to RPCH	\$ 95,000
Boone Memorial Hospital	Boone County	Grant	Emergency Room	\$ 55,000
Broaddus Hospital Association	Barbour County	Planning Grant	Senior Services	\$ 15,000
Totals				\$314,000

OVERVIEW OF HOSPITALS, FY 1996

The hospital financial data presented here are derived from the Uniform Report submitted to the Authority by each West Virginia hospital for its fiscal year ending in 1996, from the hospital's Audited Financial Statements, and from CON and Rate applications. Because the audits do not break the data by payor or by inpatient/outpatient services, this results in some discrepancies. Utilization data are taken from the Uniform Report as well as from the Authority's Uniform Bill (UB-92) discharge data base. Data for one hospital is omitted from this report. Beckley Hospital, Inc. did not file the Uniform Financial Report in time for production of this report. Minnie Hamilton Health Care Center completed its first year of operation as a hospital.

94	(.16)	3.36	3.20

^{**}Net Patient Service Margin -

Gross patient revenue less contractual allowances, uncompensated care, other discounts and operating expenses divided by net patient revenue. **The HCCRA** sets rates that determine the operating margin.

Is determined from nonpatient related activities (e.g. investment income, cafeteria sales, etc.) divided by the sum of net patient revenue plus other operating and nonoperating revenue.

Uncompensated Care (including Welch Emergency)

This section contains seven tables. The first compares the gross inpatient revenue requested by hospitals for nongovernment payors to the revenue allowed by the Authority, from 1987 through 1996. In 1996, overall nongovernment rates allowed were 4.0% more than the actual rates. These tables include rates for both Calhoun General, which has since closed, and Minnie Hamilton Health Care Center which has assumed its operations as a new facility. It is clear from this table that the allowed rate of increase for nongovernment gross inpatient revenue has declined over the past three years. This is a direct indication that the HCCRA has played an important role in keeping hospital rates low.

The second and third tables show nongovernment allowed rates per discharge for FY 1994-1997. The second table shows hospitals in alphabetical order, while the third by type of ownership and bed size group. It should be noted, that the rates listed in the column labeled 1996, are rates that are approved in CY1996 and are effective through FY1996. The median rate per discharge increased slightly (2.98% per year) over this period, as acute care discharges continued to decline.

The fourth and fifth tables show the effect of casemix adjustment on the allowed nongovernment rates. Each discharge is assigned to a Diagnostic Related Group (DRG) for which the Health Care Financing Administration (HCFA) determines a relative weight (casemix) indicating the intensity of services required (i.e. amount of resources used), and thus the expected cost. Dividing the allowed rate by the average caseweight permits comparison of rates independent of intensity of services. As would be expected, the adjusted rates show less variation. For example, West Virginia University Hospitals, whose allowed rate for 1996 was \$12,638 but which has a very high casemix (1.4535) has an adjusted allowed rate of \$8,695. Boone Memorial, whose allowed rate for 1996 was \$3,928 and whose casemix was a low .5711, has an adjusted rate of \$6,877. Other factors contribute to the need for differential rates, such as variety of services offered, complexity of cases treated, amount of uncompensated care, hospital-employed physician costs, costs of graduate medical education, age of facilities' plant and equipment, and payor mix.

The sixth table shows rates requested and allowed along with any overages and the extent to which they were found to be justified. Overages can be justified primarily by increases in casemix, outliers (i.e. charges to a patient(s) that may be significantly higher than the average), or by other special and unique circumstances affecting a particular hospital.

The seventh table is similar to the sixth, except that it addresses outpatient rather than inpatient rates.

This section contains one table that lists the capital expenditures approved and denied for general acute care hospitals for the calendar years 1993 through 1996, and the first six months of 1997.

It is apparent from the attached chart that CON requests have increased in three of the past four years as hospitals continue to grow and position themselves in the competitive market. The HCCRA has the obligation to review this expansion to ensure no unnecessary duplication of services as the hospitals expand. Without this process, an avoidable increase of health care cost could follow.

^{*} Expenditures represent projected estimated costs and include CON projects approved, projects determined not reviewable, and exemptions.

This section, Revenue and Adjusted Expenses, shows revenue and adjusted cost by payor category (Medicare, Medicaid, PEIA and all other). Calculation of adjusted cost as defined below permits approximation of the cost of bad debt and charity care, which are normally reported in terms of gross revenues lost.

The following definitions apply to the Revenue and Adjusted Expenses Section, as well as to the Summary of Hospital Adjusted Cost.

GROSS PATIENT REVENUE: The amount charged by the hospital for services provided to patients. It is the standard charge made by the hospital before discounts and contractual allowances. This same definition applies to Gross Medicare Patient Revenue, Gross Medicaid Patient Revenue, Gross PEIA Patient Revenue, and Gross Other Patient Revenue.

TOTAL OPERATING EXPENSES: The amount recorded by the hospital for items purchased or accrued as normal operating expenses. It includes, but is not limited to, items such as salaries, employee benefits, medical supplies, utilities, depreciation, interest on debt, income and provider taxes (if applicable), extraordinary items, and all other necessary supplies.

OTHER OPERATING REVENUE: Other operating revenue is the amount the hospital receives form sales of items that are not the direct result of treating patients. It includes such items as cafeteria sales and the sale of copies of medical records.

NON-OPERATING REVENUE: Non-operating revenue is the amount the hospital receives from items that are neither directly or indirectly the result of treating patients. Examples of revenue in this category are investment income and donations.

ADJUSTED OPERATING EXPENSES: As used on the Revenue and Expense Section, adjusted operating expenses represent the Total Operating Expenses minus Other Operating/Non-Operating Revenue. (Also see next definition.)

ADJUSTED COST: This definition was agreed upon by the Legislative Subcommittee on Cost Shifting. The purpose is to ascertain an approximate cost of patient care for each of the major third party payors. It is calculated as follows:

- 1. Total Operating Expenses minus (Other Operating Revenue plus Non-Operating Revenue) equals Adjusted Operating Expenses.
- 2. Adjusted Operating Expenses divided by Total Gross Patient Revenue equals the percentage relationship of Total Expenses to Total Gross Patient Revenue.
- 3. Operating Expenses as a percent of total Gross Patient Revenue multiplied by total payor revenues for each major payor classification equals Adjusted Cost for each payor.

This definition assumes that the charges bear the same relationship to costs across payors. It applies to Adjusted Medicare Cost, Adjusted Medicaid Cost, Adjusted PEIA Cost and Adjusted Other Cost.

NET PATIENT REVENUE: Net patient revenue represents the amount the hospital receives or expects to receive from patients and/or third party payors for the services provided by the hospital. This definition also applies to Net Medicare Revenue, Net Medicaid Revenue, Net PEIA Revenue, and Net Other Revenue.

NET REVENUE LESS ADJUSTED MEDICARE COST: This amount is the difference between Net Medicare Revenue and Adjusted Medicare Cost. It is the net gain (loss) from providing services to Medicare patients. This same definition applies to Net Revenue Less Adjusted Medicaid Cost, Net Revenue Less Adjusted PEIA Cost, and Net Revenue Less Adjusted Other Cost.

ADJUSTED REVENUE OVER EXPENSES: As used on the Summary of Hospital Adjusted Cost Section, this is the Adjusted Revenue Over (Under) Expenses, or Profit (Loss). It is the amount before income taxes and extraordinary gains or losses are applied.

The total net patient revenue by payor will not equal the total net patient revenue for some hospitals, primarily because of rounding differences. However, in some instances, there were variances in treatment of bad debt, contractual allowances, and disproportionate share revenues between a hospital's Uniform Report and its Audited Financial Statements.

This section shows uncompensated care with its component parts, bad debt and charity care, as a percent of gross patient revenue. This percentage has continued to decline as shown below:

	<u>1996</u>	<u>1995</u>	<u>1994</u>
General Acute Care			
Hospital	5.71%	6.05%	6.45%
All Hospitals	5.79%	6.12%	6.59%

A summary for FY1996 general acute care hospitals is as follows:

	Bad Debt	Charity Care	<u>Total</u>
Non-Profit (more than 300 beds)	3.26%	2.79%	6.05%
Non-Profit (100 to 300 beds)	3.73%	1.78%	5.51%
Non-Profit (fewer than 100 beds)	4.69%	2.30%	6.99%
Proprietary (all)	2.62%	.88%	3.50%

It will be important to develop a system to review non-profit hospitals with less than 100 beds to determine how bad debt impacts their bottom line. It must be determined what comprises the bad debt and whether the HCCRA, in association with the West Virginia Hospital Association, can assist the smaller hospitals developing a program to manage collections.

Economic conditions, services provided, and accounting policies can impact the level of charity care provided by each individual hospital and may explain the differences in level of charity care provided. To determine the total community benefit of individual hospitals, a review of total taxes (local, state, federal and income tax paid by proprietary hospitals) should be considered.

The larger percentage for all hospitals is primarily due to the inclusion of state-operated psychiatric hospitals which have extremely high rates (65-71%) of uncompensated care.

UNCOMPENSATED CARE FOR ALL HOSPITALS, FY1996

ALPHABETICAL ORDER

MOSPITAL TYPE AND NAME	LICENSED	GROSS PATIENT	BAD	% OF	CHARITY	% OF	TOTAL UNCOMPENSATED	% OF

There are two tables. The first shows changes in gross patient revenue, net patient revenue, adjusted expense and adjusted revenue over expenses for all payors, for FY 1986-1996. As in the Revenue & Adjusted Expenses Section (AROE), the total net patient revenue does not equal the sum of the component payors net patient revenue by payor because of differences in hospital uniform reports and audits, as well as rounding.

In 1996, the AROE for various Payor Groups were as follows:

	FY 1996	FY 1995
Medicare	\$(15,380,248)	\$(34,440,528)
Medicaid	(12,787,760)	20,621,686
Other**	159,375,927	109,592,310
Total Profit	\$131,207,919	\$95,773,468
**Other includes the following:		
PEIA	\$12,299,483	\$14,015,941
Other Payors***	53,500,715	22,710,304
Other Operating/Nonoperating Revenue	<u>93,575,729</u> \$159,375,927	<u>72,866,065</u> \$109,592,310

^{***} Other Payors include Commercial Insurance (including commercial HMOs and PPOs), Workers Comp, Vocational Rehab, UMWA, Self Pay, Maternal & Child Health, Charity and all Other Payors.

The second table in the Summary of Hospital Adjusted Cost Section shows the adjusted cost summary for non-Medicare and non-Medicaid revenues and expenses for FY 1986-1996. Based on the assumption of the adjusted cost calculation, it indicates the proportion of non-Medicare and non-Medicaid net patient revenue required to absorb the cost of bad debt, charity care, and depending on the year, Medicare and/or Medicaid.

ALL PAYOR HOSPITAL ADJUSTED COST SUMMARY FOR GENERAL ACUTE CARE HOSPITALS (EXCLUDING WELCH), FY1986-1996

The Inpatient Utilization Section includes three reports. The first two show data from the Uniform Report for acute care units of general hospitals, including psychiatric services. ¹¹ Patient days and discharges for newborns, such subacute services as chemical dependency and medical rehabilitation, and long-term care are excluded. The second report shows total facility data, excluding newborns. Occupancy levels are calculated using licensed beds.

Acute care occupancy levels continue to decline slightly, as did the number of licensed acute care beds.

	<u>1996</u>	<u>1995</u>	<u>1994</u>
Acute Occupancy (% of Licensed Beds Utilized)	42.9%	44.3%	47.1%
Acute Beds (Licensed)	8,158	8,442	8,474
Average Daily Census	3,516	3,744	3,990

The third report, discharges by hospital by payor includes all currently available UB-92 discharge data, including chemical dependency, medical rehabilitation and newborns, but excludes long-term care. The data base is 90% complete for 1996; approximately 10% of discharge records have not yet been submitted and/or processed.

One hospital, Beckley Hospital, Inc. did not file a Uniform Report. Total licensed beds in the state remain stable, with 10,167 reported in 1996, although shifts from acute to subacute and long-term services continue.

¹¹The State Health Plan and Standards for Certificate of Need define psychiatric services as acute care. However, psychiatric programs may be distinct from general acute care services for rate-setting and, frequently, for reimbursement purposes.

															Salational Aside Manage

The following two tables show full-time equivalent employees (FTE's), total wages and salaries (including benefits) for all services provided, and average wage and salary per FTE for FY 1994-1996. Total FTE's increased 1.34% from 1994 to 1996. Average salaries increased 3.52% from 1995 to 1996 and 7.33% from 1994 to 1996. It should be noted that Logan General Hospital has a greater proportion of physician employees than do other hospitals, which contributes to a higher average salary.

COMPARISON OF TOTAL FULL TIME EQUIVALENT'S (FTE'S) AND TOTAL WAGES AND SALARIES (INCLUDING BENEFITS) FOR ALL HOSPITALS, FY1994-1996

ALPHABETICAL ORDER

			•	,						

Two tables represent a statement of operations. The first is a composite report for general acute care hospitals; the second reports the same information in detail for all hospitals alphabetically, and the third by type of ownership and bed size group. The fourth and fifth tables show the rate of return for all hospitals. The net rate of return, calculated by dividing the EROE by the net patient revenue, for acute care hospitals was 5.84% compared to 4.50% in 1995. This profit came from the operating and nonoperating revenues and was broken down as follows:

<u>FY</u>	Net Operating Margin**	Other Operating/ Nonoperating <u>Revenue Margin</u> ***	Total Profit <u>Margin</u>
96	1.68%	4.16%	5.84%
95	1.09%	3.41%	4.50%
94	(.16)%	3.36%	3.20%

^{**}Net Operating Margin -

Is determined from the gross patient revenue minus contractual allowances, uncompensated care, other discounts and operating expenses. **The HCCRA** sets rates that determine the operating margin.

Is determined from nonpatient related activities (e.g. investment income, cafeteria sales, etc.)

The sixth and seventh tables display gross inpatient and outpatient revenue. The data contained here are derived from the Uniform Report submitted to the Authority by each West Virginia hospital for its fiscal year ending in 1996. The inpatient and outpatient gross patient revenue were taken from Worksheet 8 (Gross Patient Revenue By Payor) as reported by the hospitals. Due to variances in the way some hospitals dealt with such items as professional fees, the revenue on Worksheet 8 may not include all patient revenues and therefore may not equal the total revenue reported on Worksheet 9. Consequently, minor variances in the total gross patient revenue for each payor may occur and may not match the amounts provided in previous reports.

Roughly 63% of gross patient revenue was from inpatient services at general acute care hospitals, while virtually all (95%) is inpatient at freestanding psychiatric and rehabilitation hospitals. Overall, 64% of gross patient revenue is inpatient.

^{***}Other Operating/Nonoperating Revenue Margin -

COMPOSITE STATEMENT OF OPERATIONS FOR ALL GENERAL ACUTE CARE HOSPITALS, FY1996 (INCLUDING WELCH EMERGENCY)

The following information briefly describes each item in the Composite Balance Sheet for General Acute Care Hospitals. It displays the sub-accounts, if any, shown on the detail Balance Sheet that goes into the account on the Composite Balance Sheet.

Cash is cash in the bank available for immediate expenditure.

Net Patient Receivables are patient receivables net of estimated allowances for bad debts and contractual allowances.

Other Receivables are receivables from sources other than patients. Consists of settlement amounts due from Medicare and Medicaid; or from physicians.

Inventory is the cost of supply items on hand that will be used in the next period. It may consist of medical supplies, surgical supplies, pharmaceutical supplies and food and other supplies.

Prepaid Expenses are the cost of items that will be expended in the current period. Consists of items such as Prepaid Insurance.

Other Current Assets are items that are expected to be used during the current period. Consists of items such as short term investments and current portion of assets whose use is limited.

Other Assets are items that are not expected to be used in the current period. Consists of such items as funds held for bond indenture requirements; investments for self insured malpractice and hospitalization programs (i.e., assets whose use is limited).

Property, Plant and Equipment is the historical cost of land, building and equipment owned by the hospital. It may also include capital leases which are leases for the approximate life of the asset.

Accumulated Depreciation is the amount that has been charged to expense through the annual amortization of the cost of the property, plant and equipment.

Net Property, Plant and Equipment is the remaining cost of the Property, Plant and Equipment after reduction of the accumulated depreciation.

Total Assets is the total of the assets listed above.

Accounts Payable are amounts owed to others for goods, services and supplies purchased and received, but not paid for at the balance sheet date.

Current Maturities, Long Term Debt is the amount payable on bonds, mortgage loans, capital leases obligations and other long term debts that is to be paid in the next 12 months.

Other Current Liabilities consists of accrued expenses for wages and salaries, benefits and interest.

Long-Term Debt consists of long term debts such as notes payable to banks, revenue bonds payable and in some cases capital lease obligations.

Capital Lease Obligations consists of a portion of the long term lease obligations.

Other Liabilities consists of items such as Liabilities for self insured malpractice and employee benefit programs (pension and health care) and intercompany payables for affiliated hospitals.

Total Liabilities is the summation of all liabilities.

Fund Balance and/or Equity consists of tax exempt corporation fund balances and proprietary corporation owner's equity including capital invested and retained earnings.

Total Liabilities and Fund Balances and/or Equity is the summation of such.

The hospital utilization data presented here are derived from Worksheet 1 of the Uniform Financial Report, which lists inpatient days and discharges by payor. The data are provided by the hospital, except for the occupancy and average length of stay, which are calculated by Authority staff.

The Uniform Report is submitted by the state's general acute care, psychiatric and medical rehabilitation hospitals.

Acute psychiatric services are offered at general as well as psychiatric hospitals. Raleigh General Hospital separated psychiatric utilization data but did not separate financial information associated with that utilization. This report includes any data reported by hospitals in psychiatric line items.

The number of licensed psychiatric beds reported by the Office of Health Facility Licensure and Certification (WV DHHR) for the licensure period July 1, 1996 to June 30, 1997 is included, as well as the licensed beds reported by the hospitals on the Uniform Report for their fiscal year ending in 1996. Where hospitals combined their psychiatric and chemical dependency data, the combined bed totals are used.

The financial data included come from the Uniform Report Worksheet 5 (Operating Expenses), Worksheet 6 (Cost Allocation), and Worksheet 8 (Gross Patient Revenue by Payor). The Net Expenses for Cost Allocation result form reclassification of and adjustments to the Operating Expenses from other cost centers. The Allocated Expenses include expenses from cost centers which provide no revenue, such as capital-related costs for buildings and equipment, administrative and general, maintenance and repairs, employee benefits, medical records, and other indirect costs.

Expenses and revenue per day and per discharge were calculated by the HCCRA staff. Caution should be used in interpreting these data, as revenue and expenses may not correlate directly with the utilization data, and ancillary costs are not included in the psychiatric inpatient costs.
